

# Comprehensive Guide to Clover Apps and Features

Last updated: December 2024

# Introduction

Welcome to the "Comprehensive Guide to Clover Apps and Features." This document serves as a valuable resource for understanding the various applications and functionalities available within the Clover ecosystem. It is designed to help you navigate through the different SaaS plans, pre-installed apps, and third-party integrations effectively.

To make the best use of this guide, you can start by familiarizing yourself with the Table of Contents, which outlines the main sections and topics covered within the document. Each section provides detailed information on specific apps, their features, pricing, and how they can benefit different industries.

We recommend that you identify the specific needs of your business and refer to the relevant sections that align with your goals. Whether you are looking for tools to enhance your retail operations, streamline restaurant management, or improve customer engagement, this guide will help you discover the right solutions within Clover.

By leveraging the insights and resources provided in this document, you can optimize your Clover experience, drive efficiency, and ultimately enhance the services you provide to your customers.

# Sale

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Sale app provides a centralized interface to manage all sales transactions. It allows businesses to process payments, apply discounts, track sales, and generate receipts with ease.

## Benefits

### Retail

Streamline checkout processes, manage inventory in real-time, and enhance customer satisfaction by reducing wait times.

### Restaurants

Enable quick processing of dine-in, takeout, and delivery orders with detailed tracking and split payment options.

### Personal and Professional Services

Simplify invoicing and payment collection, making it easier to manage service-based transactions and client billing.

# Customers

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Customers app allows businesses to store and manage customer information, track transaction history, and engage in targeted marketing.

## Benefits

### Retail

Build loyalty programs, track purchase history, and send personalized promotions to increase repeat business.

### Restaurants

Manage reservations, track customer preferences, and enhance personalized dining experiences.

### Personal and Professional Services

Keep detailed client records, manage appointments, and offer tailored services based on individual client histories.

# App Market

**Developer**  
Clover

## Available on

Clover Device

## Price and subscription information

Included in the SaaS Plan

## Description

The Clover App Market provides access to a wide range of third-party apps that integrate with Clover POS systems, allowing businesses to customize their operations with additional functionalities.

## Benefits

### Retail

Explore apps for inventory management, customer loyalty programs, and advanced analytics to optimize operations.

### Restaurants

Find apps for kitchen display systems, table management, and online ordering to streamline restaurant workflows.

### Personal and Professional Services

Access scheduling tools, client management apps, and marketing solutions to enhance service delivery.

# Mobile Printer

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Mobile Printer app facilitates the use of portable printers for printing receipts and orders on the go, ideal for mobile businesses or those with multiple service points.

## Benefits

### Retail

Provide receipts at remote locations, such as pop-up shops or outdoor markets, ensuring seamless transaction experiences.

### Restaurants

Use in food trucks or for tableside receipt printing, improving efficiency and customer service.

### Personal and Professional Services

Offer on-site service receipts for clients, particularly useful for mobile professionals like repair technicians or consultants.

# Merchant Keypad Pay Display

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

\$99.00 (for hardware component)

## Description

This app pairs with the Clover Mini to create an interactive, customer-facing payment display, allowing customers to see and approve transactions in real-time.

## Benefits

### Retail

Enhance customer experience by offering a transparent payment process, reducing errors and building trust.

### Restaurants

Allow customers to split bills and view itemized receipts directly on the display, improving accuracy and satisfaction.

### Personal and Professional Services

Simplify payments for clients during checkout, ensuring clear and concise billing information.

# USB Pay Display

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The USB Pay Display app enables the use of USB-connected devices for secure payment processing, ideal for fixed POS setups.

## Benefits

### Retail

Maintain a reliable and secure checkout experience, with easy integration into existing hardware setups.

### Restaurants

Use in fixed POS stations for fast, secure transactions in busy environments.

### Personal and Professional Services

Integrate into office or studio setups where secure and stable payment processing is critical.

# Display Pole

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Display Pole app supports the use of customer-facing poles that show transaction details, helping businesses maintain transparency during checkout.

## Benefits

### Retail

Display clear transaction information to customers, reducing misunderstandings and improving trust.

### Restaurants

Provide a clear view of bill totals, particularly in fast-paced environments like quick-service restaurants.

### Personal and Professional Services

Ensure clients can easily see and confirm charges, enhancing service transparency.

# Refund

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Refund app simplifies the process of issuing refunds, ensuring accuracy and ease of use for both the merchant and the customer.

## Benefits

### Retail

Handle returns and refunds efficiently, with a clear audit trail for accounting purposes.

### Restaurants

Quickly process refunds for incorrect orders or customer dissatisfaction, maintaining high service standards.

### Personal and Professional Services

Manage refunds for pre-paid services or deposits, ensuring smooth client interactions.

# Diagnostics

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Diagnostics app provides tools to troubleshoot and resolve issues with Clover devices, ensuring minimal disruption to business operations.

## Benefits

### Retail

Quickly identify and resolve technical issues, minimizing downtime and ensuring continuous operations.

### Restaurants

Keep POS systems running smoothly during peak hours, preventing service interruptions.

### Personal and Professional Services

Ensure all devices are functioning properly, critical for service-based businesses that rely on seamless operations.

# Printers

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Printers app allows businesses to manage and configure all connected printers within their Clover POS system, whether in a single location or across multiple sites.

## Benefits

### Retail

Easily manage multiple printers for receipt, label, and invoice printing across various departments or locations.

### Restaurants

Coordinate kitchen and receipt printers to ensure orders are processed accurately and promptly.

### Personal and Professional Services

Simplify document and receipt printing across different service areas or for mobile operations.

# Employees

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Employees app offers tools for tracking employee hours, managing shifts, and processing payroll, helping businesses maintain accurate records and streamline HR processes.

## Benefits

### Retail

Track employee performance and attendance, simplifying payroll processing and shift management.

### Restaurants

Manage front-of-house and kitchen staff schedules, ensuring optimal coverage during peak times.

### Personal and Professional Services

Keep detailed employee records, manage payroll, and ensure compliance with labor laws.

# Wireless Manager

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Wireless Manager app enables businesses to manage all wireless devices connected to their Clover POS, ensuring smooth and coordinated operations.

## Benefits

### Retail

Monitor and manage wireless payment devices across the store, ensuring seamless connectivity and operation.

### Restaurants

Keep track of mobile payment devices, ensuring they are charged and functioning during busy periods.

### Personal and Professional Services

Ensure all wireless devices, such as mobile POS terminals, are working efficiently, critical for mobile or in-office service provision.

# Phone Sale

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Phone Sale app allows businesses to process transactions over the phone, integrating with Clover POS to maintain accurate sales records.

## Benefits

### Retail

Facilitate remote transactions for customers, expanding service capabilities beyond the physical store.

### Restaurants

Take phone orders for delivery or pickup, with seamless integration into the POS system for order tracking.

### Personal and Professional Services

Allow clients to pay for services remotely, particularly useful for consultations or virtual services.

# Essentials SaaS Plan Features/Pre-installed Apps

## Payments Apps +

1. [Register](#)
2. [Cash Log](#)
3. [Manual Transactions](#)
4. [Orders](#)
5. [Inventory](#)

# Register

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Register app serves as the main point of sale (POS) interface, allowing businesses to process transactions, manage product lists, apply discounts, and manage sales taxes with ease.

## Benefits

### Retail

Centralizes all sales activities, making it easy to manage complex transactions, discounts, and promotions while keeping an accurate record of sales.

### Restaurants

Customize orders, manage menu items, and process payments efficiently, reducing wait times and improving customer service.

### Personal and Professional Services

Streamline the checkout process for services, manage different service categories, and apply discounts or promotions with ease.

# Cash Log

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Cash Log app allows businesses to track all cash movements in and out of the register. It ensures accurate record-keeping for cash transactions, drops, and payouts.

## Benefits

### Retail

Maintain a clear and accurate record of all cash transactions, helping to prevent theft and discrepancies.

### Restaurants

Track cash tips, cash payments, and manage cash deposits and withdrawals during shifts.

### Personal and Professional Services

Ensure accurate cash management for payments received or expenses paid in cash, supporting precise financial records.

# Manual Transactions

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Manual Transactions app provides a way to record transactions that are not processed electronically. This includes cash payments, checks, or other non-electronic payment methods.

## Benefits

### Retail

Keep a complete record of all transactions, including those made with alternative payment methods, ensuring all sales are tracked accurately.

### Restaurants

Record cash or check payments that are not processed through the electronic POS, ensuring accurate reporting and reconciliation.

### Personal and Professional Services

Track payments made via cash, checks, or other manual methods, ensuring comprehensive financial records.

# Orders

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Orders app manages customer orders from start to finish. It allows businesses to track order statuses, manage different order types (dine-in, takeout, delivery), and coordinate with kitchen or service staff.

## Benefits

### Retail

Manage special orders, pre-orders, or back-orders, ensuring customers receive their products as expected.

### Restaurants

Seamlessly track and manage orders from the kitchen to the table, ensuring timely service and accurate billing.

### Personal and Professional Services

Coordinate orders for services or products, ensuring timely delivery or service fulfillment based on customer requirements.

# Inventory

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Inventory app helps businesses track stock levels, manage product variations, and receive alerts when inventory is low. It is essential for maintaining accurate stock records and ensuring that products are available when needed.

## Benefits

### Retail

Manage product inventory in real-time, ensuring that stock levels are maintained, and out-of-stock situations are minimized.

### Restaurants

Track ingredients and menu item availability, helping to avoid running out of key items during service.

### Personal and Professional Services

Monitor supplies and materials needed for services, ensuring that everything is on hand to meet client needs.

# Register SaaS Plan Features/Pre-installed Apps

## Payments SaaS Apps +

1. Register
2. Cash Log

# Table Service SaaS Plan Features/Pre-installed Apps

Essentials/Register SaaS Apps +

1. Clover Dining

# Clover Dining

**Developer**  
Clover

## Available on

Clover App Market

## Price and subscription information

Included in the SaaS Plan

## Description

The Clover Dining app is designed specifically for table service restaurants, providing tools to manage front-of-house operations, including table mapping, order management, and staff coordination. It integrates seamlessly with other Clover apps to create a complete point-of-sale system tailored for the restaurant industry.

## Benefits

### Restaurants

#### Table Management

Visualize and manage your dining room layout, track table statuses, and optimize seating arrangements to maximize covers during service.

#### Order Management

Easily split or combine checks, send orders directly to the kitchen, and handle modifications or special requests with ease, ensuring accurate and timely order fulfillment.

#### Staff Coordination

Coordinate between servers, kitchen staff, and management through real-time updates, reducing errors and improving communication.

#### Customer Experience

Enhance the dining experience by reducing wait times, ensuring order accuracy, and providing personalized service through detailed customer insights.

#### Reporting and Analytics

Access detailed reports on sales, table turnover, and staff performance, helping you make informed decisions to improve efficiency and profitability.

# Account Software Sync

**Developer**  
BiancoNet

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/ Platform

- Web

## Price and subscription information

£14.95/month

## Description

Automates the synchronization of daily Clover order summaries to Xero, eliminating manual entry and reducing labor costs

## Benefits

- Full automation, eliminating manual data entry
- Sends previous day's data including sales, taxes, and payments
- Summarizes all tender types, including cash and cards, with separate Amex support
- Compatible with all Clover devices, includes a knowledge base, and UK-based support

## How the app can help different industries

### Retail, Restaurants, Personal services

By providing accurate, automated bookkeeping and financial data synchronization, it reduces errors and labour costs, streamlining financial management

# Actions

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/ Platform

Station Solo, Station Duo (Second Generation), Flex (Third Generation), Mini (Third Generation), Flex (Second Generation), Station Duo, Mini (Second Generation) and Flex

## Price and subscription information

£1.99/month for a license covering all features across the entire store.

## Description

Enhances POS usability by allowing automatic actions like adding items, fees, discounts, or notes to orders based on specified triggers.

## Benefits

Offers a multitude of features in a single app, facilitates the addition of various elements to orders automatically, supports advanced customizations, and transparent pricing without hidden fees.

## How the app can help different industries

### Retail

Automates adding items, fees, or discounts to orders, simplifying transactions, especially for stores with frequent promotions or varying item types, enhancing customer checkout experiences.

### Restaurants

Streamlines order processing by automatically adding special requests, discounts, or additional charges based on the order type or dining preferences, improving order accuracy and customer satisfaction.

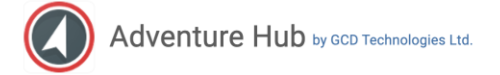

### Personal services

Facilitates customization of orders for services with varied pricing, discounts, or additional fees, ensuring accurate billing and enhancing client management efficiency

# Adventure Hub

## Developer

GCD  
Technologies  
Ltd

### Available on

#### SaaS Plans

- Essentials
- Register
- Table Service

#### Devices/Platform

Mobile, and Web

### Price and subscription information

Free

### Description

Adventure Hub, developed by GCD Technologies Ltd, seamlessly integrates with an existing Adventure Hub account, revolutionising the management of an adventure centre.

This Clover connector app is designed to effortlessly handle unscheduled walk-ins, aligning with the schedule set in the Adventure Hub system. Additionally, it simplifies the process of checking in guests who have pre-booked through the Adventure Hub website.

To utilise this app, an existing Adventure Hub account is required.

## Benefits

- Streamlines walk-in management
- Effortlessly integrates with the Adventure Hub scheduling system
- Simplifies the check-in process for pre-booked customers
- Enhances customer experience with efficient booking management
- Completely free, making it accessible to all adventure businesses

## How the app can help different industries

### Retail

- Manage walk-in customers more efficiently, especially during peak seasons
- Improve inventory tracking for adventure gear and merchandise

### Restaurants

- Coordinate walk-in diners with ease during busy periods
- Manage reservations and bookings seamlessly

### Personal services

- Manage walk-in appointments, helping to maximise your productivity
- Streamline the appointment booking system

# Age Verify

## Developer

PayPlaxe  
Europe

### Available on

#### SaaS Plans

- Essentials
- Register
- Table Service

#### Devices/Platform

Station Solo, Station Duo (First and Second Generation), Flex (First, Second and Third Generation), Mini (Second and Third Generation).

### Price and subscription information

A monthly subscription of £0.99.

### Description

This app is an innovative solution designed to streamline the age verification process for businesses. Age Verify by PayPlaxe Europe allows users to easily configure age-restricted items, creating one or more item groups with minimal age requirements for orderly transactions.

## Benefits

- Simplified and efficient age verification process
- Capability to save the current age for the entire order, increasing the speed of transaction
- The helpful cloud sync feature ensures data consistency across multiple devices

## How the app can help different industries

### Retail

- Easily implement age restrictions for products like tobacco and energy drinks
- Enhance compliance with legal requirements for age-restricted sales

### Restaurants

- Seamlessly manage the sales of age-restricted items like alcohol
- Streamline the ordering process for customers and staff

### Personal services

- Applicable in environments like spas or tattoo shops where age restrictions are in place
- Improve customer experience by quickly verifying age for specific services

# Analytics BusinessQ

Analytics BusinessQ  
by Qualia d.o.o.

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Web

### Price and subscription information

First 14 days with full advanced features

- Lite (£7.99/month)
- Basic (£16.00/month)
- Advanced (£24.00/month, usually £32)
- Professional (£34.00/month, usually £75)

### Description

Transforming Clover data into actionable insights and strategic decisions, this cutting-edge app leverages AI and machine learning to offer predictive analytics that guide your business. From business owners and managers or accountants and controllers, this app is tailored to meet the needs of any business.

Offering comprehensive analysis through two types of reports; quick overview or order-based. Analytics BusinessQ covers various business dimensions like profit, customer behaviour, category, modifiers and many more.

## Benefits

- Access to machine learning and AI-driven insights for informed business decisions
- Customise your reports based on several factors, including item, order and employees
- Detailed reports and exports with over 50 columns – the most extensive in the marketplace
- Compatible with a range of devices, ensuring seamless operation
- Automatic report emails, so you can get these informative insights straight into your inbox
- Multi-location support integrates all your locations into one report, with discounts available for 5+ locations

## How the app can help different industries

### Retail

- Gain insights into customer buying patterns and stock management
- Optimise pricing and promotion strategies based on detailed sales analysis

### Restaurants

- Understand customer preferences and peak times for better service planning
- Track menu performance and make data-driven decisions for menu changes

### Personal services

- Analyse customer trends to tailor services and promotions
- Efficiently manage appointments and staff scheduling based on data insights

### Professional services

- Utilise detailed financial and operational data for strategic planning
- Enhance client management and service delivery through custom data analysis

# Automatic Reports

Automatic Reports  
by Tursus Software

## Developer

Tursus  
Software

### Available on

#### SaaS Plans

- Payments Plus
- Essentials
- Register
- Table Service

#### Devices/Platform

Web

### Price and subscription information

A 30-day free trial followed by a choice of two monthly subscription plans:

- **Standard (£16.95/month)**  
Choose between Summary or Inventory reports
- **Pro (£27.95/month)**  
Access both Summary and Inventory reports

### Description

Automatic Reports seamlessly integrates with the Clover POS system to provide up-to-date sales data across all devices. Simply link a Dropbox account, select the reports needed and let the app do the rest.

This software automatically generates and updates reports daily, ensuring businesses always have the latest information at their fingertips.

## Benefits

- Effortless access to real-time sales data
- Automatic updates to give businesses access to up-to-date data
- Easy integration with Dropbox for accessible data storage and retrieval

## How the app can help different industries

### Retail

- Utilise summary reports to track daily sales trends and inventory sales, aiding in efficient stock management
- Leverage inventory reports for detailed analysis of product performance, helping businesses plan effective markdown strategies

### Restaurants

- Access detailed sales data to understand menu item popularity and customer preferences
- Utilise inventory reports for effective kitchen management, reducing food waste and controlling costs

### Personal services

- In industries like beauty and wellness, summary reports can be used to track client appointments and service popularity
- Monitor inventory of supplies and products effectively, ensuring optimal stock levels for uninterrupted service

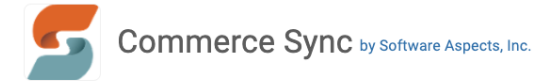

### Professional services

- For businesses like consultancy or legal services, summary reports can be used for a comprehensive view of client engagement and service demand
- Leverage inventory reports to manage office supplies and resources efficiently, ensuring operational effectiveness

# Commerce Sync (Part 1)

## Description

Commerce Sync by Software Aspects Inc, available on the Clover App Market, is the ultimate automated bookkeeping solution designed to streamline financial record-keeping for businesses. With Commerce Sync, you can effortlessly sync your Clover sales data with popular accounting software like QuickBooks and Xero, making financial management a breeze. Say goodbye to tedious manual data entry and costly bookkeeping errors, as Commerce Sync takes care of everything automatically, every day. Join over 12,000 satisfied merchants who have already experienced the time-saving benefits of Commerce Sync.

## Benefits

### Time Savings

Commerce Sync is your dedicated virtual bookkeeper, recovering an average of 300 hours per year that you would have otherwise spent on manual data entry. This newfound time can be better utilized to focus on growing your business.

### Error Reduction

Eliminate costly bookkeeping errors by automating the process. Commerce Sync ensures accuracy in recording sales activity, including Income, Refunds, Tax (inclusive), Tips and Discounts.

### Versatile Support

Commerce Sync supports various industries and business types, offering flexibility to businesses in different sectors. It seamlessly integrates with QuickBooks and Xero, ensuring compatibility with a wide range of accounting needs.

### Historical Data Transfer

Don't worry if you're behind on your bookkeeping. Commerce Sync can transfer your previous sales data, whether it's for one month or several years, allowing you to catch up quickly and effortlessly.

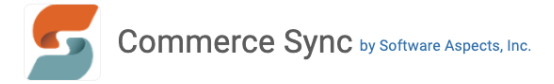

### Dedicated Customer Support

Access an online knowledge base and a dedicated customer experience team to assist you whenever you need help or have questions.

## How Commerce Sync can help different industries

### Retail

- Easily manage your sales, refunds and tax tracking
- Categorize and track sales by product categories for insightful income analysis
- Streamline financial processes, allowing you to focus on providing excellent customer service

### Restaurants

- Automate the recording of daily sales, tips and discounts, reducing manual data entry
- Keep an accurate record of sales by customer for loyalty program tracking
- Free up valuable time that can be used to enhance the dining experience for your patrons

### Personal services

- Efficiently handle income tracking for various personal services
- Eliminate bookkeeping hassles and dedicate more time to your clients
- Utilize historical data transfers to catch up on past records, even if you've fallen behind

### Professional services

- Automate income tracking and categorization of services rendered
- Ensure accurate financial records without spending hours on bookkeeping
- Benefit from the time-saving features to focus on serving your clients and growing your practice
- Commerce Sync is compatible with all Clover devices (Station, Mini, Mobile, Go and Flex) and works seamlessly with all Clover plans (Register, Register Lite and Payments Plus). It's the solution that empowers businesses across various industries to simplify their financial management, reduce errors and reclaim valuable time for more critical tasks

### Devices/Platform

Station Solo, Station Duo (Second Generation), Flex (Third Generation), Mini (Third Generation)

## Price and subscription information

A monthly subscription of £1.99.

## Description

Enhance digital engagement by making it easier for customers to connect with businesses online after their purchase. This user-friendly app prints essential contact details such as website, phone and social media platforms, directly on receipts.

## Benefits

- Automatically add contact details and social media profiles to every receipt, turning each transaction into a marketing opportunity
- Add a phone number, email address, social media handles and GPS coordinates as per the business preference
- Enjoy the functionality of the app with no additional fees

## How the app can help different industries

### Retail

- Retailers can encourage customers to their e-commerce website for online shopping
- Sharing GPS coordinates can help customers easily find physical store locations for future visits

### Restaurants

- Direct customers to online menus or ordering platforms for future convenience
- Encourage customers to share their dining experience and tag the restaurant in social media posts

### Personal services

- Hairdressing salons, beauty salons, spas and fitness centres can include their online booking platforms on receipts, making it easy for clients to schedule future appointments

# Cost Discounts

Cost Discounts by PayPlaxe Europe

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Payments Plus
- Essentials
- Register
- Table Service

### Devices/Platform

Station Solo, Station Duo (Second Generation), Flex (Third Generation), Mini (Third Gen)

## Price and subscription information

A monthly subscription of £0.99.

## Description

Unlock the power of flexible pricing with Cost Discounts. This app allows businesses to easily apply discounts based on item costs, offering businesses a dynamic way to manage pricing strategies. They also have the opportunity to either offer discounts to all customers or target specific ones.

Businesses can integrate the app with the payment screen using the tender button and sync services across devices to streamline the discount application process, making it efficient and user-friendly.

## Benefits

- Tailor discounts to suit all customers or target specific groups for personalised promotions
- Ensure consistent pricing strategies across Clover devices
- A straightforward subscription model with no hidden fees

## How the app can help different industries

### Retail

- Apply cost-based discounts to move inventory more efficiently, perfect for clearance sales or end-of-season promotions
- Offer deals to frequent shoppers or members of a loyalty program

### Restaurants

- Offer discounts for special occasions, like birthdays, anniversaries or local festivals to attract more customers
- Implement dynamic pricing for happy hours or off-peak times to boost sales

### Personal services

- Attract new customers by offering discounted services on their first visit
- Give customers discounts for referring new customers, encouraging word-of-mouth marketing

### Professional services

- For services like consulting or coaching, offer initial sessions at a discounted price
- Apply cost-based pricing for bulk hours or services purchased, encouraging larger commitments from clients

# Customer Assigner

- Table Service

### Devices/Platform

Web, Station Solo, Station Duo (Second Generation), Flex (Third Generation), Mini (Third Gen)

## Price and subscription information

A monthly subscription of £0.99.

## Description

Customer Assigner is an intuitive app designed to automate and simplify the process of customer assignment in business operations. This useful tool allows businesses to assign specific customers when they start a new order or on the payment screen to help them provide a personalised service.

## Benefits

- Streamlines the order process by efficiently linking customers to orders
- Enhances customer service by personalising the transaction experience
- Reduces time and effort needed for manual data entry
- Improves accuracy in customer order tracking and management

## How the app can help different industries

### Retail

- Track customer purchase history accurately for targeted promotions
- Speed up the check-out process, enhancing customer experience

### Restaurants

- Personalise dining experiences by associating orders with customer profiles
- Improve order accuracy, especially for repeat customers

### Personal services

- Efficiently manage client information, enhancing service quality
- Create a more personalised service experience by remembering the customer's preferences

### Professional services

- Enhance client engagement by remembering details from previous interactions
- Improve client relationship management with streamlined order assignment

# Customer Export

### Devices/Platform

Web

## Price and subscription information

Free.

## Description

Customer Export simplifies data management by allowing businesses to swiftly and efficiently export customer data from their Clover POS system. This tool is essential for businesses looking to analyse customer trends, manage marketing campaigns, or migrate data into other systems.

## Benefits

- Streamline customer data management by exporting information quickly
- Facilitate marketing and customer relationship initiatives with accessible data
- Enhance data analysis for better business decision-making
- Simplify the process of data migration or integration with other platforms

## How the app can help different industries

### Retail

- Create targeted marketing campaigns based on customer data insights
- Analyse purchasing trends to optimise inventory and sales strategies

### Restaurants

- Understand customer preferences and dining habits for menu planning
- Segment customer data for specialised promotions and loyalty programmes

### Personal services

- Tailor service offerings by analysing customer demographics and preferences
- Enhance customer relationship management through personalised communication

### Professional services

- Leverage client data for strategic business development and planning
- Improve client engagement with data-driven insights into their needs and preferences

# Customer Survey

#### Devices/Platform

Web and Mobile

### Price and subscription information

A choice of three monthly subscription plans:

- **Standard (£4.95/month)**  
Adds surveys to all receipts. Businesses can view the surveys through email, web, or the POS app
- **Pro (£9.95/month)**  
Include custom questions and employees
- **Elite (£14.95/month)**  
Export survey data, including email addresses of respondents

### Description

Enhancing customer feedback collation, this app allows businesses to add a survey to every Clover receipt, no matter if it's print, text or email.

### Key features include:

- Prompting satisfied customers to leave positive Yelp reviews
- Immediate email notifications upon survey completion
- Access to completed surveys through the POS app or Clover Web Dashboard
- Valuable insights into customer experiences, allowing businesses to quickly resolve issues

## Benefits

- Encourages positive public feedback on platforms like Yelp
- Provides real-time customer feedback for immediate action
- Enhances customer experience by addressing their concerns
- Helps refine business strategies based on customer insights

## How the app can help different industries

### Retail

- Gain insights into customer satisfaction and shopping experiences
- Use feedback to improve product and service offerings as well as customer service

### Restaurants

- Understand guest experiences to enhance menu and service quality
- Encourage satisfied diners to share positive reviews online

### Personal services

- Collect client feedback to tailor services and improve satisfaction
- Identify areas for improvement in client engagement and service delivery

### Professional services

- Utilise client feedback for service optimisation and relationship building
- Leverage positive reviews to attract new clients and retain existing ones

- Table Service

#### Devices/Platform

Web

### Price and subscription information

A choice of two monthly subscriptions:

- Mission control user (£1.99/month)
- All-access (£4.99/month)

### Description

This app offers a user-friendly solution for receiving daily sales summaries through email. Simply select the recipients and receive a comprehensive email containing sales, tender, category, item and modifier group statistics.

For businesses with multiple locations, the Mission Control feature consolidates reports from all sites into a single email, complete with a summary page that details each location separately and provides an overall total.

## Benefits

- Easy-to-understand daily sales summaries delivered directly to your inbox
- Consolidated reports for multi-location businesses, ensuring a clear overview of all operations
- Ensures businesses stay informed about their performance every day

## How the app can help different industries

### Retail

- Receive daily sales insights to track performance and adjust strategies
- Monitor sales across multiple store locations, streamlining management

### Restaurants

- Keep tabs on daily restaurant sales, category and item performance
- Compare sales across different restaurant locations for strategic planning

### Personal services

- Track daily appointment revenues and service popularity
- Manage the performance of multiple service centres or locations effortlessly

### Professional services

- Receive daily updates on client engagements and service revenues
- Efficiently oversee multiple office locations through combined reports

# Deliverect

## Developer Deliverect

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Web

### Price and subscription information

Free.

### Description

Deliverect simplifies restaurant operations by integrating online orders from platforms like Uber Eats, Deliveroo and Just Eat directly with the Clover POS system.

With Deliverect, businesses can receive all online orders on one system and automatically print tickets in the kitchen. The app also allows for easy menu management across multiple channels and provides valuable insights, helping to identify opportunities for improvement.

## Benefits

- Streamlined tracking and management of online orders directly through the Clover POS system
- Effortless menu and stock management across multiple platforms and locations
- Comprehensive sales overviews for enhanced business insights

## How the app can help different industries

### Restaurants

- Coordinate online food orders from multiple platforms, enhancing kitchen efficiency and reducing wait times
- Utilise detailed sales insights to refine menu offerings and improve customer experience

# Deposit Manager

## Developer

PayPlaxe  
Europe

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Station Solo, Station Duo (Second Generation), Flex (Third Generation), Mini (Third Generation),

### Price and subscription information

License - GB£0.99 per month

### Description

Enables creation and management of deposits for items, such as bottle deposits, allowing for refunds upon return, streamlining the deposit and refund process.

## Benefits

Simplifies managing item-specific deposits, improving operational efficiency and customer service.

## How the app can help different industries

### Retail

Retailers can manage bottle deposits efficiently, assigning specific deposit values to items and processing refunds seamlessly.

### Restaurants

It facilitates the handling of returnable packaging, ensuring accurate deposit collection and refund upon item return. This app streamlines the DRS process, reducing manual effort, ensuring accuracy and improving customer satisfaction through smooth transaction experiences.

# DigiTickets Sales & Redemptions

DigiTickets Sales & Redemptions by Tickett Enterprises Ltd

## Developer

Tickett Enterprises Ltd.

### Available on

#### SaaS Plans

- Essentials
- Register
- Table Service

#### Devices/Platform

Station Solo, Station Duo (Second Gen), Flex Third Gen), Mini Third Gen), Mobile.

### Price and subscription information

Free.

### Description

This app offers a streamlined solution for managing ticket sales and redemptions directly through a Clover device, enabling the seamless sale of DigiTicket's products.

All transactions are synchronised with DigiTicket's API, eliminating the need for inventory management for ticketed events and making it an ideal tool for business event management.

## Benefits

- Direct integration with DigiTickets for easy access to events and pricing
- Convenient ticket printing directly from Clover devices
- Efficient ticket redemption at the point of sale, particularly effective with Clover Flex

## How the app can help different industries

### Retail

- Simplify ticket sales for in-store events or promotions
- Enhance customer experience with on-the-spot ticket printing and redemption

### Personal services

- Offer and redeem tickets for workshops, classes, or special service events
- Streamline the process for clients attending paid sessions or events

### Professional services

- Facilitate the organisation of seminars, conferences, or professional gatherings
- Provide an efficient ticketing solution for company-hosted events or public talks

# Digital Loyalty

## Developer

**Developer**  
Zoomifi INC

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Web

## Price and subscription information

£9.99/month

## Description

Enables organizations to collect donations round-the-clock at multiple locations, offering an easy and engaging experience for donors.

## How the app can help different industries

### Retail

Facilitates easy donation collection at point-of-sale, enhancing corporate social responsibility initiatives.

### Restaurants

Integrates donation options into the customer payment process, encouraging charitable giving.

### Personal services

Offers clients an effortless way to contribute to causes, building community engagement.

# Donation Kiosk

**Developer**  
CSI Works

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo and Web.

## Price and subscription information

The app offers unlimited use for a monthly subscription of £7.99.

## Description

Donation Kiosk is a specialized app designed for churches and non-profits to facilitate donations. By utilizing Clover Mini or Flex devices, these organizations can set up a customer-facing kiosk for donations. Features include the ability to set up specific donation reasons and amounts, as well as allowing donors the flexibility to choose their donation amount. The app supports semi-attended self-serve donation processes and provides merchants with control over the donation screen's design, including color, fonts and images.

## How the app can help different industries

### Retail

While primarily designed for non-profits and churches, retail businesses could use Donation Kiosk to collect donations for charitable causes or community projects at the point of sale, enhancing their community engagement and CSR initiatives.

### Restaurants

Restaurants can integrate Donation Kiosk into their payment processes, allowing customers to add a donation to their bill for local charities or causes supported by the restaurant, fostering a sense of community involvement.

### Personal services

Businesses in the personal services industry, such as salons or fitness centers, could use Donation Kiosk to support fundraising efforts for relevant causes, allowing customers to donate as part of their payment process, thereby enhancing the business's community connection and support.

# Drink Exchange

## Developer

JDP  
Worldwide Ltd

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo and Web.

### Price and subscription information

The app is free to install, including full training. After installation, there is a monthly fee of £200 (or €260) for unlimited use, support and geographical exclusivity. The subscription is on a month-by-month basis without lengthy contracts.

### Description

Drink Exchange transforms a bar's atmosphere by turning it into a stock market for an evening, with food and drink prices fluctuating every five minutes based on customer purchases. Live trading prices are displayed on TVs, making it an engaging and interactive experience for patrons. Typically utilized as a weekly event or a novel happy hour concept, Drink Exchange has been proven to increase sales by an average of 40%. The system integrates seamlessly with Clover, ensuring that price changes are automatically updated on devices in line with those displayed on TVs. Implementation is straightforward and interested parties are encouraged to contact the developer for more details.

## How the app can help different industries

### Retail

While Drink Exchange is specifically designed for bars and restaurants, retail establishments could adapt a similar concept for promotional events, creating an interactive shopping experience where product prices fluctuate based on demand, encouraging more engagement and sales.

### Restaurants

Beyond bars, restaurants can incorporate Drink Exchange during special events, offering dynamic pricing on select food and drink items. This not only makes dining more entertaining but can also help in managing inventory by increasing sales of overstocked items.

### Personal services

Though not directly applicable, personal service businesses could draw inspiration from the Drink Exchange for creating engaging, event-based promotions. For example, a spa could offer dynamic pricing on less popular services during off-peak hours to increase bookings.

# EZ Price Check

**Developer**  
SPS

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web.

## Price and subscription information

The subscription cost is £4.95 per month

## Description

EZ Price Check transforms any Android tablet into a self-service price check terminal. It allows customers to independently scan an item's barcode or QR code to view its price and details, syncing directly with a merchant's current Clover inventory. This not only enhances the shopping experience by providing instant access to product information but also saves staff time, reducing the need for customers to inquire about prices. The app is designed for easy setup; merchants can download the application on any Android device, connect their Clover merchant account using their web dashboard credentials and place the device anywhere in the store for customer convenience.

## How the app can help different industries

### Retail

Retailers can greatly benefit from EZ Price Check by providing customers with an efficient way to learn about products without needing direct assistance. This enhances the customer shopping experience, potentially reduces the workload on staff and streamlines store operations by enabling self-service price checking.

### Restaurants

Although not directly designed for restaurants, the app could be adapted for use in self-service or fast-casual dining settings where customers might benefit from scanning QR codes to learn more about menu items, ingredients, or even special offers.

### Personal services

Businesses in personal services can utilize EZ Price Check in innovative ways, such as allowing clients to scan products or services for more information, pricing, or available appointment times, thus enhancing client engagement and operational efficiency.

# Easy Labels

## Developer

Seven Spaces

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo.

### Price and subscription information

The advanced subscription is available for £7.99/month, which includes features like adjusting text font and barcode size, as well as adding a logo to the label.

### Description

Easy Labels is designed to streamline inventory management and customer checkout processes by enabling the printing of product labels directly from your Clover device. The app supports the printing of UPC-A, EAN-13 or EAN-8 barcodes, along with product price, unit and name, on labels. This facilitates fast and efficient checkout and better inventory tracking. It also features the capability to generate UPC codes for proprietary products. Easy Labels offers customization options for text font size and type, barcode size and the inclusion of logos on labels. It is compatible with several Brother QL series printers, though it's noted that the Brother QL-800 printer is not compatible with Clover Flex or Mobile devices. To ensure functionality, users are advised to disable the "Editor Lite" feature on compatible printers and reboot the Clover device after connecting.

## How the app can help different industries

### Retail

Retailers can greatly benefit from Easy Labels by enhancing the efficiency of the checkout process and improving inventory management. Custom labels make it easier for staff to locate products and process transactions, while also providing clear information to customers.

### Restaurants

While primarily targeted at retail, restaurants that sell branded products or have a retail component can use Easy Labels to manage merchandise or packaged goods, improving operational efficiency and customer service.

### Personal services

Service-based businesses, such as salons or wellness centers that sell products, can utilize Easy Labels to manage their retail inventory efficiently. The ability to customize labels adds a professional touch to the product presentation, enhancing brand perception.

# Ecwid Connector

**Developer**  
Ecwid Inc.

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/Platform

Web

## Price and subscription information

The app is available for free.

## Description

Ecwid Connector seamlessly integrates your Clover device with your Ecwid online store, automating the synchronization of products and stock levels. It offers a straightforward setup process, instantly updating your inventory and orders across both platforms. Ecwid enhances your online sales capabilities by making it easy to sell on Facebook and Instagram, allowing you to add your store to various social networks, websites, marketplaces, and blogs. All changes are immediately reflected across all sales channels. Recognized for its rapid implementation by G2 Crowd reviewers, Ecwid is a flexible and comprehensive e-commerce platform suitable for businesses of any size. With 1.5 million users across 175 countries, Ecwid facilitates online selling like no other, enabling businesses to establish a robust web presence and engage customers on their favorite social platforms.

## How the app can help different industries

### Retail

Retailers can significantly benefit from the Ecwid Connector by easily managing their online and in-store inventory in one place. This integration allows for a seamless omnichannel retail experience, helping businesses to expand their reach online and on social media platforms.

### Restaurants

Restaurants can use Ecwid to sell merchandise, gift cards, or even takeout orders online, integrating their point of sale with their online presence. This opens up new revenue streams and marketing opportunities through social media sales.

### Personal services

Service-based businesses can leverage Ecwid to sell products related to their services, book appointments online, and offer package deals. The integration with Clover facilitates managing bookings and product sales simultaneously, streamlining operations and enhancing customer service.

# Enterprise Reporting

## Developer

Tickett Enterprises Ltd

### Available on

#### SaaS Plans

- Essentials
- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo, Web and Mobile.

### Price and subscription information

The app operates on a custom pricing model, with pay-per-action fees set at £1.00 per Reporting Suite. For detailed pricing based on specific needs, businesses are encouraged to contact Tickett Enterprises Ltd directly.

### Description

Enterprise Reporting is a robust analytics and reporting tool that offers comprehensive insights into your Clover data. It allows businesses to run various reports to analyze sales, performance, and trends, providing a clear view of business health at a glance. The app features a fully configurable KPI dashboard, making it easy to monitor key performance indicators in real-time, whether on a big screen for broader visibility or on mobile for on-the-go management. It includes full role and permission controls, ensuring that data access and management are securely governed by user roles and permissions, enhancing data security and operational efficiency.

## How the app can help different industries

### Retail

Retailers can leverage Enterprise Reporting to track sales performance, inventory levels, and customer trends, enabling them to make informed decisions about stock management, marketing strategies, and customer engagement efforts.

### Restaurants

This app allows restaurant owners and managers to monitor key metrics such as table turnover rates, average spend per customer, and menu item performance. These insights can help optimize menu offerings, improve service speed, and enhance overall customer satisfaction.

### Personal services

Businesses in the personal services sector, such as beauty salons, fitness centers, and healthcare clinics, can use Enterprise Reporting to analyze appointment bookings, service popularity, and client retention rates. This data can inform staffing decisions, promotional activities, and service development to better meet client needs.

# Expense & Receipt Scanner

Expense & Receipt Scanner by Tickett Enterprises Ltd

## Developer

Tickett Enterprises Ltd

### Available on

#### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo, Web and Mobile.

### Price and subscription information

Standard subscription is priced at £9.99 per month.

### Description

The Expense & Receipt Scanner app leverages the built-in camera of Clover devices to record and manage receipts and expenses directly from the point of sale. This tool simplifies the process of tracking and tying expenses to cash adjustments, providing businesses with an efficient way to manage financial records. Users can easily access scanned receipts and expense reports from the web dashboard, making it convenient to monitor and analyze financial data.

## How the app can help different industries

### Retail

Retail businesses can benefit from the Expense and Receipt Scanner by streamlining the process of tracking in-store expenses and purchase receipts. This helps in maintaining accurate financial records, simplifying the reconciliation process and improving budget management.

### Restaurants

For restaurants, managing daily expenses such as food orders and kitchen supplies becomes more straightforward. The app aids in quickly recording these expenses, offering a clear overview of the establishment's financial outflow, which is crucial for controlling costs and maximizing profit margins.

### Personal services

Businesses in the personal services industry, such as salons, fitness centers and wellness spas, can use the app to efficiently manage receipts for supplies, equipment purchases and other operational expenses. This aids in financial planning and ensures that all expenditures are accounted for and easily retrievable for reporting or auditing purposes.

# FACILIPAY

## Developer

LoyLap

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo, Web.

### Price and subscription information

The starter package is available for £15.00 per month.

### Description

Facilipay by LoyLap is an innovative digital wallet solution designed for smart workplaces, campuses and venues, aiming to enhance customer engagement, reduce operational overheads and drive revenue growth. This app introduces an omni-channel commerce experience with features such as a branded mobile app for cashless payments, click and collect services fully integrated with Clover inventory, digital loyalty programs, personalized in-app offers, digital receipts, self-service kiosks, cashless vending and keyless locker systems. Facilipay's streamlined operations support payments that are 80% faster than chip and pin and 40% faster than traditional contactless methods, revolutionizing the payment process.

## How the app can help different industries

### Retail

Retailers can use Facilipay to offer customers a seamless shopping experience with digital wallet payments, click and collect services and digital loyalty rewards, encouraging repeat business and increasing customer satisfaction.

### Restaurants

Facilipay enables restaurants to provide customers with the convenience of pre-ordering, cashless payments and digital loyalty stamps, enhancing the dining experience while improving operational efficiency.

### Personal services

Businesses in the personal services sector, such as spas, gyms and salons, can benefit from Facilipay by offering clients digital booking and payment options, loyalty rewards and self-service kiosks, streamlining the customer journey from booking to service delivery.

# Fast Food Orders Display, Two Versions.

## One very fast. Yummy-No printers.

Fast Food Orders Display, Two Versions. One very fast. Yummy-No printers.  
by RetailCP

**Developer**  
RetailCP

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Mobile and Web.

### Price and subscription information

The service is priced at £4.95 per month, with the first month offered as a free trial.

### Description

The Fast Food Orders Display app by RetailCP is tailored for takeaway restaurants seeking an efficient, printer-free solution for managing orders. It offers two versions of the display app: APK-2, which is the fastest option and APK-1, which is also fast but includes the display of order types such as "ToGo" and "Delivery". This flexibility allows restaurants to choose the version that best suits their operational needs. The app enables the connection of as many display tablets as desired without any additional fees and users can easily toggle between "Open" and "Completed" views to track all order items on each display screen. The system is praised for its reliability and can be used on any Android touchscreen tablet, making it a versatile choice for fast-paced food service environments.

## How the app can help different industries

### Retail

While primarily designed for restaurants, retail businesses could use the Fast Food Orders Display system to manage orders or service requests in fast-paced environments where quick turnover is critical, such as in-store cafes or quick-service counters.

### Restaurants

This app is specifically designed to optimize the efficiency of fast food and takeaway restaurants. By displaying orders in an easily accessible manner, it speeds up the preparation and delivery process, reducing wait times and improving customer satisfaction.

### Personal services

Businesses in the personal services sector, such as beauty salons or fitness studios that offer refreshments or merchandise, could adapt the Fast Food Orders Display system for managing orders or appointments, ensuring a smooth operation even during peak times.

# FlexPay

## Developer

Tickett Enterprises Ltd

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen), Station Solo, Web.

### Price and subscription information

The standard subscription fee is £6.99 per month.

### Description

Flexpay revolutionizes the order and payment process within establishments by enabling seamless order transfer from one Clover device to another for payment, regardless of the device type. By selecting the FlexPay option on the payment screen, staff are provided with a 2-digit code that can be used to quickly pick up the order and complete payment on any other connected Clover device. This technology not only enhances operational efficiency but also significantly reduces queue times, as it allows for the continuous ringing up of orders without the need for a device to be free for payment processing. This app is ideal for busy environments where minimizing customer wait times and optimizing the use of all available Clover devices is crucial.

## How the app can help different industries

### Retail

In retail environments, Flexpay can streamline the checkout process, allowing for faster service during peak shopping hours and improving overall customer satisfaction by reducing wait times.

### Restaurants

For restaurants, particularly those with high foot traffic like Neverspoons Bar and Restaurant, Flexpay can facilitate a quicker ordering and payment process, enhancing table turnover rates and allowing staff to serve more customers efficiently.

### Personal services

Businesses in the personal services sector can benefit from Flexpay by offering clients a quick and hassle-free payment experience, particularly in busy salons, spas or fitness centers where time is of the essence for both clients and service providers.

# Food & Drink Exchange

## Developer

Drink Exchange

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Mobile and Web.

### Price and subscription information

The app itself is free, with pay-per-action fees based on the duration of the promotion: £39.99 for 5-12 hours, £29.99 for 3-5 hours and £19.99 for up to 3 hours.

### Description

The Food & Drink Exchange app transforms bars, restaurants, eateries and coffee shops into thrilling environments by implementing a stock market-style pricing system for food and drinks. Prices fluctuate based on customer demand, with popular items becoming more expensive and less popular ones decreasing in price. This dynamic pricing strategy, displayed on TVs and mobile phones, is designed to attract patrons, boost sales and promote specific items. The system's algorithm adapts over time to maximize profit margins. The app promises quick setup and substantial increases in sales, backed by a money-back guarantee if there's no improvement.

## How the app can help different industries

### Retail

While primarily designed for food and beverage establishments, retail businesses can adapt the concept of dynamic pricing for special events or promotions, creating excitement and encouraging customers to make impulse buys

### Restaurants

This app is a perfect fit for restaurants looking to increase customer engagement, enhance the dining experience and maximize profits through dynamic pricing and promotions, particularly during happy hours or special events

### Personal services

Service industries such as beauty salons or fitness centers could implement a form of dynamic pricing for off-peak hours or less popular services, encouraging clients to book at times or for services they might not normally consider

# Fortune Cookie

## Developer

Abreeze  
Technology

### Available on

#### SaaS Plans

- Payments Plus
- Essentials
- Register
- Table Service

#### Devices/Platform

Web.

### Price and subscription information

The all-access subscription is priced at £0.99 per month

### Description

Fortune Cookie by Abreeze Technology brings an innovative twist to traditional receipt generation, aiming to enhance customer satisfaction and engagement. This app adds a unique feature to your receipts by including fun and positive fortune cookie messages, turning an ordinary part of the customer transaction into a memorable experience. Additionally, it offers the ability to embed a QR code linking directly to your business's website or social media pages, driving online traffic and fostering digital engagement. With a promise of at least one new fortune every minute, Fortune Cookie ensures a fresh experience for your customers with every visit.

## How the app can help different industries

### Retail

Retail businesses can leverage Fortune Cookie to create a distinctive checkout experience, encouraging customers to return by making each purchase memorable. The QR code feature also supports driving online engagement, promoting online sales or social media interaction.

### Restaurants

Restaurants can offer guests a novel take-home experience with their receipt, enhancing customer satisfaction and potentially increasing social media shares when customers post their fortunes online. The QR code can direct customers to online menus, reservation systems, or promotional pages.

### Personal services

Businesses in personal services, such as salons, spas and fitness centers, can use Fortune Cookie to add a personal touch to their service receipts, fostering loyalty and encouraging customers to engage with their online platforms for bookings, reviews, or service promotions.

# Fun and Games

Fun and Games by Abreeze Technology

## Developer

Abreeze  
Technology

### Available on

#### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

#### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen).

### Price and subscription information

The app itself is free. Custom coloring sheet designs are available for an additional fee of £100.00 per design.

### Description

Fun and Games introduces a creative way to enhance customer experience directly from your Clover POS system. This app allows businesses to print FREE games and coloring sheets from their receipt printers, providing a delightful distraction for children and patrons of all ages. It's an innovative approach to keeping guests entertained while they wait, dine, or shop. For businesses looking to further personalize this experience, Abreeze Technology offers a custom design service. This service includes the creation of unique coloring sheets that feature your brand logo and theme, adding an exclusive touch to your customer engagement efforts.

## How the app can help different industries

### Retail

Retail stores can offer coloring sheets and games to young shoppers or children of customers, making the shopping experience more family-friendly and enjoyable. This can lead to longer visits and increased customer satisfaction.

### Restaurants

Restaurants can keep young diners entertained with games and coloring sheets, enhancing the dining experience for families and potentially increasing repeat business.

### Personal services

Businesses such as dental offices, hair salons and pediatric clinics can use the fun sheets to keep children occupied during waits, making appointments more pleasant for both kids and parents.

# Games on Receipt

Games On Receipts by PayPlaxe

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Flex (Third Gen), Mini (Third Gen), Station Duo (Second Gen).

## Price and subscription information

A single license subscription is priced at £1.99 per month, covering all features for your entire store.

## Description

Games on Receipts by PayPlaxe turns ordinary sales receipts into engaging puzzles and games for customers. This innovative app can automatically print a variety of puzzles on receipts every time an item is sold (this feature can be enabled in the settings) or can be triggered manually within the app. It's an excellent tool for businesses in the entertainment sector, such as cafes, bars, or kids' clubs, looking to add a unique touch to their customer service experience. The app is designed to be easy to use, with no hidden fees, making it an attractive option for attracting new customers and providing additional value with every purchase.

## How the app can help different industries

### Retail

Retail stores can use Games on Receipts to create a memorable shopping experience, encouraging customers to return. The games can also serve as a marketing tool, potentially drawing in families and children.

### Restaurants

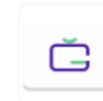

For restaurants, the puzzles can keep diners, especially families with children, entertained while waiting for their meals, enhancing the overall dining experience and customer satisfaction.

### Personal services

Businesses in personal services, such as waiting rooms in clinics or salons, can offer receipts with puzzles to clients, providing a unique way to pass the time and improving the overall service experience.

# Gift Cards

Gift Cards by LoyLap

**Developer**  
LoyLap

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Station Duo (Second Gen), Gen 3 devices

## Description

The “Gift Cards” app by LoyLap, available on the Clover App Market, is a powerful tool designed to help businesses in various industries boost customer engagement, increase sales and enhance customer loyalty through the strategic use of gift cards and loyalty programs. With a user-friendly interface and a wide range of features, this app simplifies the entire process, from creating custom gift cards to tracking customer activity and offering personalized rewards.

## Benefits

### Enhanced Customer Retention

Gift cards encourage customers to return to your establishment, with 48% of them coming back for at least a second visit. Pair this with LoyLap’s integrated Loyalty System and you can transform first-time visitors into loyal, repeat customers through enticing online rewards like Digital Stamps, Credit Back, or Personalized Discounts.

### Streamlined Operations

The Gift Card App makes it effortless for your team and customers to use. This ease of use translates to an annual increase in unit sales, higher-margin sales, improved cash flow and opportunities for acquiring new customers.

### End-to-End Convenience

From designing your custom gift cards to ordering them with direct delivery, LoyLap simplifies the process. You just need to place a request and wait for your order to arrive. Additionally, the Welcome Box, complete with marketing materials and a full demo, ensures your entire team is well-equipped for gift card success.

### Real-Time Insights

Automated reports provide real-time insights into your sales performance, enabling you to make informed decisions and adjust strategies as needed.

### Digital Gift Cards

Customers can send e-vouchers directly through email, making it convenient for both them and the recipients.

### Dedicated Help and Support

Count on LoyLap’s support team to assist you in maximizing the app’s potential and boosting your sales.

## How the app can help different industries

### Retail

- Retailers can create branded gift cards and loyalty programs to attract and retain customers
- Integration with e-commerce websites facilitates online sales and balance checking
- Real-time reporting helps retailers monitor sales performance and tailor promotions

### Restaurants

- Restaurants can offer gift cards for special occasions, encouraging customers to return for dining experiences
- Digital gift cards can be easily shared for events and celebrations
- Personalized discounts and loyalty rewards can boost repeat visits

### Personal services

- Personal service providers, such as spas and salons, can offer gift cards for treatments and appointments
- The Loyalty System can reward clients for frequent visits or referrals
- Automated reports assist in tracking appointment bookings and sales

### Professional services

- Law firms, consultants and other professional services can offer gift cards for consultations or services
- Website integration allows clients to easily purchase services online
- Customized loyalty programs can incentivize repeat business and referrals

In summary, the LoyLap “Gift Cards” app is a versatile solution that caters to a wide range of industries by helping businesses create, manage and leverage gift cards and loyalty programs to drive customer engagement, sales growth and customer loyalty. Whether you’re in retail, restaurants, personal services, or professional services, this app can be a valuable addition to your business toolkit.

# HOP Bill to Room

HOP Bill to Room by HOP Software Limited

## Developer

HOP  
Software  
Limited

### Available on

#### SaaS Plans

- Essentials
- Register
- Table Service

#### Devices/Platform

Station Duo (Second Gen), Gen 3 devices

### Price and subscription information

The application is available for free.

### Description

HOP Bill to Room is a sophisticated application designed to bridge the gap between hospitality services and hotel management systems. It allows seamless integration of food and beverage bills from Clover devices into the HOP Property Management System (PMS), enabling hotel guests to conveniently charge their purchases directly to their room account. This app not only enhances the guest experience by providing a smooth, hassle-free billing process but also streamlines operations for hotel staff, reducing manual entry and potential errors.

## How the app can help different industries

### Retail

While primarily tailored for the hospitality industry, retail outlets within hotels or resorts can utilize HOP Bill to Room to offer guests the convenience of charging purchases directly to their rooms, enhancing the shopping experience.

### Restaurants

Hotel restaurants and bars can greatly benefit from this app by allowing guests to enjoy their dining experience without worrying about immediate payment, encouraging more on-site dining and potentially increasing revenue.

### Personal services

Spa, wellness centers and other personal service providers operating within a hotel setting can offer guests the ease of adding service charges to their room bill, promoting the use of hotel amenities and services.

#### Devices/Platform

Web

### Price and subscription information

The app is available for free.

### Description

HOP End of Day is an innovative solution designed by HOP Software Limited to streamline the reporting process for businesses with hospitality operations. This app integrates Clover Till data directly into the HOP Property Management Software (PMS), providing unified and simplified reporting. HOP PMS is a comprehensive, cloud-based system that consolidates data for listings, reservations and guests onto a single dashboard. This integration enables businesses to maximize revenue, avoid double bookings and efficiently manage hotel operations. The system supports syncing with a business's website and major booking channels like Airbnb, Expedia, Booking.com and Hotel Rez, offering unparalleled ease of management and accessibility.

## How the app can help different industries

### Retail

While primarily tailored for the hospitality industry, retail businesses with associated lodging facilities or those looking to expand into accommodations could benefit from the streamlined operations and unified reporting features of HOP End of Day.

### Restaurants

Restaurants within hotels or resorts can utilize this app to integrate their sales data into the broader property management system, allowing for seamless financial and operational oversight.

### Personal services

Service providers operating within the hospitality sector, such as spa and wellness centers located in hotels, can leverage the HOP End of Day app for efficient management and integration of their service billing with the hotel's overall system.

- Register
- Table Service

#### Devices/Platform

Station Duo (Second Gen), Gen 3 devices

### Price and subscription information

The app is available for free.

### Description

HOP PMS (Property Management Software) by HOP Software Limited is a sophisticated, cloud-based system designed to consolidate all your property management needs into a single, intuitive dashboard. This comprehensive platform facilitates the storage and management of listings, reservations and guest information, enabling businesses in the hospitality sector to maximize revenue, prevent double bookings and manage operations with unprecedented ease. The software's powerful integrations allow for seamless synchronization with your own website and major booking channels like Airbnb, Expedia, Booking.com and Hotel Rez, thus ensuring efficient management of your business from any location.

## How the app can help different industries

### Retail

Although primarily developed for the hospitality industry, retail businesses with associated accommodation facilities or those planning to venture into the hospitality sector can greatly benefit from HOP PMS's comprehensive management capabilities.

### Restaurants

Restaurants within hotels or resorts can utilize HOP PMS to better integrate with the overall property management system, ensuring a smoother operation and enhanced guest experience by coordinating dining reservations and guest stays.

### Personal services

Businesses offering personal services within the hospitality industry, such as spas, wellness centers, and event planners operating in hotels or resorts, can leverage HOP PMS for efficient booking management and service coordination, enhancing guest satisfaction and operational efficiency.

# House Account Tab

House Account Tab by iCodice LLC

## Developer

iCodice LLC

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

#### Devices/Platform

Station Duo (Second Gen), Gen 3 devices

### Description

With Loyalty by LoyLap, businesses like yours gain access to a powerful suite of features designed to boost customer spending and loyalty. Backed by Machine Learning Algorithm Research, our app has shown that LoyLap customers spend a staggering 16% more per transaction than regular clients, making it an invaluable tool for businesses across various industries.

### Online ordering

Streamline your online sales process and make it convenient for customers to order from your business.

### Benefits

#### Customer behavior analysis

Loyalty by LoyLap empowers you to analyze your customers' behavior patterns. Identify those who haven't visited your establishment recently and take action. Send personalized discounts or engage them with mobile notifications through a branded loyalty app that encapsulates your unique business essence. This integration with your POS system ensures seamless communication with your customers.

#### Increased spending

Rewarding your customers has never been easier. Studies show that customers spend a remarkable 35% more after receiving a reward. With Loyalty by LoyLap, you can choose from a range of loyalty programs, including:

#### Stamp loyalty

A digital version of the classic "Buy one, get one free" offer, but in a convenient online format.

#### Credit back loyalty

Reward customers with credits they can spend within your business.

#### Discount loyalty

Provide discreet discounts to your most loyal customers, introducing them to new products or services

#### Upfront loyalty

Allow customers to top up their accounts for your business, ensuring immediate funds in your merchant bank account.

#### Cost-effective integration

Loyalty by LoyLap seamlessly integrates with your POS system at no extra cost for all merchants who have already signed up for our Paid Gift Card App. These two apps work hand in hand to attract new customers and then convert them into loyal, recurring patrons.

#### Versatile compatibility

Loyalty by LoyLap is designed to work harmoniously with the entire LoyLap Suite of Software, which includes:

#### In-app marketing

Enhance your marketing efforts within your branded app to engage customers effectively.

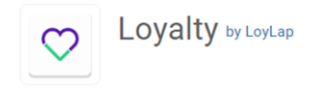

#### Self-service kiosks

Improve the customer experience by offering self-service kiosk options.

#### Custom-Branded Apps

Create a unique and personalized experience for your customers with custom-branded apps.

# Loyalty by Loylap (Cont'd)

## How Loyalty by LoyLap can help different industries

### Retail

Boost customer retention and spending by implementing loyalty programs that encourage repeat purchases. Engage your customers with personalized discounts and rewards to keep them coming back for more.

### Restaurants

Increase customer loyalty in the highly competitive restaurant industry. Offer enticing rewards, discounts and credits to build a loyal customer base and keep tables filled.

### Personal services

Whether you're a salon, spa, or fitness center, Loyalty by LoyLap helps you maintain a steady flow of clients. Reward regular visitors, introduce them to new services and keep your appointment books filled.

### Professional services

Lawyers, consultants and other professionals can benefit from upfront loyalty options, ensuring a steady stream of income. Keep clients engaged and coming back for your expertise.

Get started with LoyLap Loyalty today and explore how our app can revolutionize your business in your respective industry. Visit [loylap.com/pricing](https://loylap.com/pricing) for more details on our pricing plans and take your business to new heights with Loyalty by LoyLap.

# Mix or Match Discount Bundler

Mix or Match Discount Bundler  
by CSI Works

**Developer**  
CSI Works

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Station Duo (Second Gen),  
Gen 3 Devices and Station Solo.

## Price and subscription information

Pricing details are not provided, suggesting that interested users should contact CSI Works directly for information on costs associated with the app.

## Description

The Mix or Match Discount Bundler app by CSI Works allows merchants to create versatile and dynamic discount scenarios directly on their Clover devices. This app enables the management of discount stacking, offering the flexibility to allow or disallow duplicate discounts. Merchants can create bundled discounts for single items, a mix of items, or offer progressive discounts encouraging customers to "buy more, save more." Discounts can be scheduled to trigger on a one-time basis, recur on a set schedule, or be manually applied during checkout. Additionally, the app provides options for creating specific combo deals, whether mixed by customers or predefined by merchants and various discount triggers such as percentage off, dollar off, or combo deal construction.

## How the app can help different industries

### Retail

Retailers can leverage this app to create attractive bundled offers, driving sales of specific products and increasing overall purchase values. The flexibility in discount management also allows for tailored promotions to clear out inventory or highlight new arrivals.

### Restaurants

Restaurants can use the Mix or Match Discount Bundler to offer special combo meals or discounts on bulk purchases, encouraging larger orders and enhancing customer satisfaction through value deals.

### Personal services

Service industries, such as beauty salons and fitness centers, can create bundled service offers, encouraging clients to try a combination of services at a discounted rate, thus increasing customer retention and cross-selling opportunities.

# Movylo

Movylo by Movylo

- Table Service

#### Devices/Platform

Web

### Price and subscription information

Free for up to 25 customers. It implies that there might be additional pricing tiers or features available for businesses with more than 25 customers, but specific details would need to be checked directly with Movylo for more comprehensive pricing structures beyond the free tier.

### Description

Movylo is more than just a loyalty program; it's a complete automated commerce solution designed for local businesses looking to reclaim lost sales by rewarding existing customers and re-engaging inactive ones. With features including customer list growth, creation of personalized loyalty programs and cards, unlimited promotion creation, multi-channel customer engagement, review collection and feedback management, Movylo operates on autopilot to save business owners time while driving extra sales. The app's functionality supports a range of marketing and sales activities with minimal effort required from the business owner, making it an efficient tool for enhancing customer relationships and increasing revenue.

## How the app can help different industries

### Retail

Retail businesses can benefit from Movylo by building a dedicated customer base, rewarding repeat customers and driving sales through targeted promotions based on shopping habits and interests.

### Restaurants

Restaurants can use Movylo to create a loyalty program, send out special offers and discounts to encourage repeat visits and collect customer feedback to improve the dining experience.

### Personal services

- Service-oriented businesses such as beauty salons, fitness studios and wellness centers can leverage Movylo to maintain a connection with their clients, reward loyalty and promote services directly to customers' smartphones, increasing bookings and customer engagement
- Movylo offers a powerful, automated solution for businesses across various sectors to actively engage their customer base, promote loyalty, and drive incremental sales, all with minimal manual effort

# Nutshell

Noster Mobile

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web

## Price and subscription information

Early Bird Special! Access to the full app is free for a limited time offer.

## Description

Nutshell, developed by Noster Mobile, is a sophisticated yet user-friendly business management tool designed to empower business owners with actionable data insights. By closely working with business owners to identify key performance metrics, Nutshell facilitates the optimization of profit margins through comprehensive monitoring of operational data. The app features a streamlined dashboard for tracking revenue, customer metrics, average spend, labor hours, variable costs, customer service efficiency and sales category breakdowns. Nutshell's emphasis on data utilization extends to evaluating the impact of business changes, employee performance and identifying top-performing products by profit or sales volume, making it an invaluable asset for data-driven decision-making.

## How the app can help different industries

### Retail

Retailers can benefit from Nutshell's ability to track sales per category and customer spending patterns, enabling targeted marketing and inventory management strategies to enhance profitability.

### Restaurants

The app offers restaurant owners insights into average spend per customer, labor efficiency and the financial impact of menu changes, aiding in operational efficiency and menu optimization.

### Personal services

- For personal services industries, such as beauty salons and fitness studios, Nutshell can help monitor customer service metrics and manage variable costs, ensuring optimal staffing and service quality
- Nutshell provides businesses across various sectors with a powerful platform to harness their data, enabling informed decisions that drive efficiency, customer satisfaction and profitability. With its current Early Bird Special, businesses have a unique opportunity to access comprehensive data management and analysis tools at no cost

# Online Ordering

Online Ordering by LoyLap

## Developer

LoyLap

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Station Duo (Second Gen), Gen 3 Devices and Station Solo.

### Price and subscription information

Offered with the “Grow Plan” at €45 per month through the Clover App platform. Enjoy a 30-Day Free Trial to explore additional features. The plan includes a free allowance with subsequent charges of just 2.5% per transaction.

### Description

Online Ordering by LoyLap revolutionizes how businesses approach digital sales, integrating seamlessly with your website, app, social media and physical locations through QR codes for table ordering. This comprehensive solution is designed to maximize profits with minimal charges, offering features such as in-store pickup, QR menus, table ordering, delivery and automatic account reconciliation with Clover POS. Additionally, LoyLap enriches customer engagement through integrated loyalty and gift card features, enabling businesses to attract and retain clients effectively. With customizable configurations, menu setup support and no additional hardware requirements, Online Ordering ensures an optimal customer experience while simplifying the operational process for business owners.

## How the app can help different industries

### Retail

Retailers can use Online Ordering to extend their sales channels, offering customers the convenience of shopping online with options for in-store pickup or delivery, enhanced by loyalty rewards and gift card incentives.

### Restaurants

This app is particularly beneficial for restaurants, allowing customers to order ahead, enjoy tableside QR ordering, or opt for delivery. The integrated loyalty and gift card system encourages repeat visits and higher spend per visit.

### Personal services

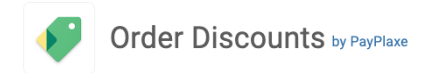

Service providers can leverage Online Ordering to schedule appointments or sell products related to their services. The loyalty program encourages clients to return, while the gift card feature can attract new customers.

# Order Discounts

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Station Duo (Second Gen),  
Gen 3 Devices and Station  
Solo.

## Price and subscription information

The app is available for a subscription fee of £1.99 per month, covering all features for your entire store.

## Description

Order Discounts by PayPlaxe is designed to streamline the discount application process for businesses using Clover devices. This app allows for the automatic addition of discounts to orders or specific items, facilitating both scheduled and on-the-fly discount strategies. Key features include the ability to name discounts, specify discount amounts or percentages and set start and end times for each discount. Additionally, discounts can be synced across devices, ensuring consistent pricing and promotions regardless of the point of sale. The app also supports the addition of manual discounts directly through the Clover Register app, enhancing flexibility in sales transactions.

## How the app can help different industries

### Retail

Retailers can benefit from using Order Discounts to manage sales and promotions seamlessly, encouraging increased foot traffic and purchase volume. The ability to schedule discounts in advance and apply them automatically helps in planning strategic sales events.

### Restaurants

Restaurants can utilize the app to offer time-based discounts during off-peak hours or special promotions on specific menu items, thereby driving business during slower times and increasing overall revenue.

### Personal services

Service-based businesses, such as salons, spas and fitness centers, can use Order Discounts to incentivize repeat business and attract new clients through tailored discount offerings on services or membership packages.

# Order Labels

Order Labels by Seven Spaces

## Developer

Seven Spaces

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Station Duo (Second Gen), Gen 3 Devices and Station Solo.

### Price and subscription information

Basic subscription is priced at £6.99 per month.

### Description

The Order Label app, developed by Seven Spaces, revolutionizes order management by automatically printing customized labels for various items, including tea or coffee cups and pizza boxes. This app allows for significant customization, including the addition of a store logo, customer information and the choice of text font on the label. Compatible with the Brother QL series printers, Order Label supports a range of label sizes, ensuring versatility across different types of orders. This seamless integration aims to enhance order accuracy, speed up service delivery and improve overall customer satisfaction.

## How the app can help different industries

### Retail

In retail settings, Order Label can be used to quickly label packaged goods, customized orders, or click-and-collect items, improving efficiency and customer service.

### Restaurants

For restaurants and cafes, particularly those offering takeaway or delivery services, this app ensures that beverage and food orders are accurately labeled, reducing the risk of mix-ups and enhancing the customer pickup experience.

### Personal services

While not directly applicable, personal services businesses that offer product sales alongside services can utilize Order Label for efficiently managing product orders, ensuring items are correctly labeled and prepared for customers.

# Order Paper

Order Paper by Abreeze Technology

- Table Service

#### Devices/Platform

Station Solo and Web.

### Price and subscription information

Pricing Update: Mini/Mobile: £15.99 for a pack of 20 rolls, 2-Ply with 1 Ribbon. All orders include free shipping

### Description

Order Paper simplifies the process of acquiring paper rolls for POS devices. With just three clicks, users can select their desired quantity and confirm their shipping address, ensuring prompt delivery to their doorstep. Billing is seamlessly integrated within the app, eliminating the need for manual payment entry.

## How the app can help different industries

### Retail

Order Paper ensures retailers have a consistent stock of receipt rolls for their point-of-sale systems, facilitating smooth transactions and customer service.

### Restaurants

Restaurants can rely on Order Paper to maintain an uninterrupted supply of order tickets and receipts, crucial for efficient order processing and record-keeping.

### Personal services

For home-based businesses or consultants, Order Paper provides a convenient solution for managing POS paper supply, ensuring operations run smoothly without interruptions.

# Pay by bank with EchoPay

## Developer

EchoPay  
Technology

### Available on

#### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

#### Devices/Platform

3rd Gen Devices.

### Price and subscription information

There's a monthly minimum fee of £10.00, which includes 20 transactions. Beyond this allowance, each transaction incurs a cost of £0.50.

### Description

EchoPay introduces a seamless “Pay by bank” option to your Clover device, streamlining the payment process through instant, secure account-to-account transfers. By generating a QR Code on your Clover screen, customers can effortlessly scan and pay using their mobile banking app, ensuring a secure digital payment journey. This system eliminates the risks of fraud and chargebacks, as funds are cleared and settled instantly. Additionally, the order status is automatically updated on the Clover device upon completion, allowing for the prompt printing of receipts and enhancing the customer experience.

## How the app can help different industries

### Retail

Retail businesses can benefit from EchoPay’s efficient and secure payment system, providing customers with a hassle-free checkout experience. Instant settlement improves cash flow, essential for inventory and business management.

### Restaurants

For restaurants, the app offers a quick and secure way for customers to pay their bills, reducing wait times and improving table turnover without compromising payment security.

### Personal services

Service providers, such as beauty salons, fitness centers and wellness spas, can use EchoPay for a smooth payment process, ensuring clients enjoy a seamless service experience from start to finish.

# Payment Insights | BusinessQ

**Developer**  
Qualia d.o.o.

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Web.

## Price and subscription information

Standard subscription is priced at £3.99/month, which includes access to 8 reports, no limits and a multi-location feature.

## Description

Payment Insights | BusinessQ by Qualia d.o.o. is a web-based reporting tool designed to provide merchants, especially those on the Payments Plus Plan, with detailed and visual insights into their payment transactions across all locations. This app facilitates the monitoring of payment details, trends by date and hour and payments per employee, customer and tender type. With the capability to generate multi-dimensional analyses, Payment Insights is an essential tool for merchants seeking to understand and optimize their payment processes. While the app is optimized for Payments Plus Plan merchants, it is accessible to all merchants seeking to improve their payment tracking and analysis. For those on the Register Lite or Register Plan seeking more features, Qualia also offers the original Analytics app.

## How the app can help different industries

### Retail

Retailers can utilize Payment Insights to track sales trends, understand customer payment preferences and identify peak sales hours or top-performing employees, aiding in staffing and marketing decisions.

### Restaurants

Restaurants can benefit from detailed payment reports to analyze average spend per customer, payment method preferences and the efficiency of table turnover, allowing for better operational planning and customer service improvements.

### Personal services

For personal service businesses, such as salons and wellness centers, Payment Insights can provide valuable data on customer spending habits and service popularity, enabling personalized promotions and improved service scheduling.

Station Duo (Second Gen),  
and Station Solo.

## Price and subscription information

The app is available under a licensing agreement for £1.99/month, which covers all features for your entire store.

## Description

Payouts Manager by PayPalxe is a comprehensive app designed to streamline the process of managing various types of payouts directly through your Clover register. This includes handling deposits back, bottle refunds, cash drops, payroll distributions, tips, lottery payouts, video payouts, rewards and other customer payouts. The setup process is straightforward, allowing for the creation of custom payout templates for frequent transactions and provides a dedicated payout button within the Clover register app for ease of use. Features include the ability to remove cash from the register, accept money as payment and generate detailed reports with the option to export payout logs to a Microsoft Excel file for record-keeping and analysis.

## How the app can help different industries

### Retail

Retailers can benefit from Payouts Manager by efficiently managing bottle refunds, cash drops, and customer rewards, enhancing the customer service experience and streamlining in-store financial transactions.

### Restaurants

This app aids in the distribution of tips and payroll to staff, as well as managing cash drops and refunds, ensuring accurate and efficient financial operations within the restaurant setting.

### Personal services

For businesses in personal services, such as salons and wellness centers, Payouts Manager can facilitate the management of tips, rewards and other payouts to staff or customers, promoting transparency and efficiency.

# Pintuna Gift Card

Pintuna Inc

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/Platform

Station Duo (Second Gen),  
Gen 3 Devices, Station Solo  
and Web.

## Price and subscription information

Basic subscription is £15.00 per month, plus pay-per-action fees of £0.02 for every £1 of purchased gift card value. The plan includes selling up to 25 gift cards per month with in-store redemption only and offers a free 30-day trial.

## Description

Pintuna Gift Card provides a seamless solution for businesses to start offering both digital and eco-friendly physical gift cards within minutes through their Clover devices. The app facilitates the sale of gift cards, which can be purchased with cash or credit card and allows for easy in-store redemption. It also supports the issuance of digital store credits for refunds or promotions, enhancing customer satisfaction and loyalty. The simple registration and installation process ensures businesses can quickly integrate Pintuna Gift Card into their operations, while the service's support for designing physical cards helps maintain brand consistency and appeal.

## How the app can help different industries

### Retail

Retailers can boost revenue and attract new customers by offering branded gift cards, enhancing the shopping experience and encouraging repeat visits. Store credits can also be used effectively for returns or promotions.

### Restaurants

Restaurants can use gift cards as a way to encourage diners to gift meals to friends and family, potentially introducing new patrons to the restaurant and building loyalty among existing customers.

### Personal services

For personal service businesses like beauty salons, spas and fitness centers, offering gift cards can provide a convenient gift option for customers, while store credits can be an attractive incentive for future services.

# Price Check

Price Check by PayPlaxe

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/Platform

Gen 3 Devices, Station Solo and Web.

## Price and subscription information

License: £0.99/month  
All features included; one subscription covers your entire store

## Description

Price Check allows users to quickly check the price of items by scanning their barcode or searching by name. The app also supports kiosk mode for versatile usage. Additionally, users can utilize the companion app for seamless integration.

## Features

- Barcode Search: Easily scan any item using your barcode scanner to view its price, name, code and optional quantity
- Name Search: Enter the product name to access detailed information including price, name, quantity (optional), code and last modified date

## How the app can help different industries

### Retail

Price Check assists retailers in maintaining accurate pricing information, enabling efficient inventory management and pricing strategies.

### Restaurants

Restaurants can utilize Price Check to monitor stock levels of ingredients and supplies, ensuring timely replenishment and cost-effective operations.

### Personal services

For small businesses and entrepreneurs, Price Check provides a cost-effective solution for managing inventory and pricing, streamlining operations and reducing overhead costs.

# QR Codes On Receipts

## Description

QR Codes On Receipts enables users to effortlessly print QR codes containing contact information, WiFi passwords, websites and more on receipts. Users can schedule QR codes, test them before usage and benefit from cloud sync capabilities.

## How the app can help different industries

### Retail

Retailers can utilize QR Codes On Receipts to enhance customer engagement by providing convenient access to essential information such as contact details, website links and WiFi passwords.

### Restaurants

Restaurants can leverage QR Codes On Receipts to streamline operations and improve customer satisfaction by offering WiFi passwords and links to menus or online ordering platforms.

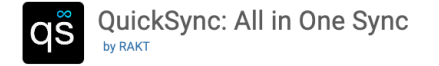

### Personal services

For service-based businesses, QR Codes On Receipts offers a versatile tool for sharing contact information, collecting customer feedback and facilitating communication with clients.

# QuickSync: All in One Sync

**Developer**  
RAKT

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web.

## Price and subscription information

Basic Tier: Free (Only select if already subscribed from Shopify)

## Description

QuickSync, developed by RAKT, is a comprehensive synchronization tool designed to streamline eCommerce operations across various platforms such as Shopify, Clover and TikTok. It facilitates real-time synchronization of inventory and products, ensuring consistent and up-to-date information across all stores. QuickSync simplifies order management, supports effortless import/export functionalities, provides multi-location support and includes inbuilt currency conversion for international sales.

## How the app can help different industries

### Retail

QuickSync empowers retailers to efficiently manage inventory and product listings across multiple online platforms, ensuring seamless operations and maximizing sales opportunities.

### Restaurants

Restaurants utilizing eCommerce platforms can benefit from QuickSync by maintaining accurate inventory levels and synchronized product listings, enabling streamlined order fulfillment and enhanced customer satisfaction.

### Personal services

For service-based businesses operating online stores, QuickSync offers a user-friendly solution for synchronizing inventory and product data, simplifying eCommerce management and optimizing business operations.

# Register Plus

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web.

## Price and subscription information

Register Plus Lite: £4.95/month

Standard: (Price not provided)

Pro: (Price not provided)

## Description

Register Plus simplifies the selection process for businesses by allowing easy product selection and image upload through its web portal. Users can assign orders to tables or custom names, enhancing organization and efficiency. With the standard version, users can assign tables to tabs, add or edit notes and edit orders on the tab. The Pro version offers API integration to Register Plus for additional functionality. Register Plus is particularly beneficial for bars, restaurants, or rental businesses looking to streamline their operations.

## How the app can help different industries

### Retail

Register Plus facilitates product selection and organization, streamlining the checkout process for retail businesses.

### Restaurants

Register Plus offers features such as assigning orders to tables, editing orders and adding notes, making it a valuable tool for restaurants to enhance efficiency and customer service.

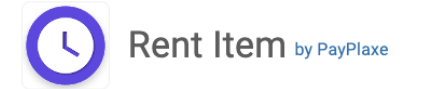

### Personal services

Personal service providers, such as rental businesses, can benefit from Register Plus by efficiently managing orders and enhancing customer experience through organized operations.

# Rent Item

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

3rd Gen Devices

## Price and subscription information

License: £1.99/month

## Description

Rent Item is a versatile rental management app designed for businesses that charge by the minute, hour, day, or second. It offers an easy setup and seamless synchronization between devices, with no hidden fees. Businesses can rent out a variety of items such as tables, cars, playrooms, equipment, suits, bicycles, pool tables and more. The app allows users to create items for rent, track rental time, manage deposits, print special QR-receipts for customers, search by order ID and add special notes to each order. Rent Item is fully integrated with Clover Register for enhanced functionality.

## How the app can help different industries

### Retail

Rent Item simplifies the rental process for retail businesses, allowing them to offer items for rent with ease and track rental durations accurately.

### Restaurants

Restaurants can utilize Rent Item to rent out equipment, event spaces, or other items on an hourly or daily basis, streamlining the rental process and enhancing revenue opportunities.

### Personal services

Personal service providers, such as rental shops or event organizers, can benefit from Rent Item by efficiently managing their rental inventory, tracking rental durations and providing seamless customer experiences.

# Reports2Mail

Qualia

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web

## Price and subscription information

Lite: £6.50/month

Basic: £12.00/month

Advanced: £16.00/month

## Description

Reports2Mail is an easy, intuitive and time-saving app that delivers detailed reports directly to your email inbox. Powered by #BusinessQ, a business intelligence and data visualization software, Reports2Mail provides merchants with daily, weekly, or monthly information on sales, revenue, employees, tenders and more. Tailored for business owners, managers, accountants and controllers, this app offers simple and user-friendly setup with a few clicks report definition. Users can select predefined or create custom reports, choose the frequency of receiving reports (daily, weekly, or monthly) and specify the data period for the reports. Reports2Mail allows users to receive reports in Excel or CSV format and supports multi-location integration for businesses with multiple locations.

## How the app can help different industries

### Retail

Reports2Mail provides retail businesses with detailed insights into sales, revenue and inventory, helping them make data-driven decisions to optimize operations and drive growth.

### Restaurants

Restaurants can benefit from Reports2Mail by receiving reports on sales, revenue and order types, allowing them to monitor performance, identify trends and make informed decisions to improve efficiency and profitability.

### Personal services

Personal service providers, such as event organizers or consultants, can use Reports2Mail to track revenue, manage expenses and gain insights into their business performance, enabling them to make informed decisions and drive success.

# Retail

**Developer**  
Aptimyz

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web and 3rd Gen Devices

## Price and subscription information

Standard: £69.00/month

## Description

Retail by Aptimyz offers comprehensive inventory management for single or multisite locations, without limitations on inventory size. It provides industry-leading customizable reports that can be saved and auto-emailed for convenience. The app seamlessly integrates with Commerce platforms, ensuring instant syncing of inventory and customer data. Retail also features live, intelligent stock takes, allowing stores to efficiently manage inventory during operational hours. Additionally, it offers an efficient stock transfer system with full auditability, facilitating easy movement of stock between locations.

Aptimyz provides an all-in-one retail solution with easy-to-use interfaces for both point of sale and back-office management. It streamlines data processing, saving businesses time and effort. The integration with online business further enhances efficiency, allowing businesses to focus on core activities.

## How the app can help different industries

### Retail

Retail is designed to meet the needs of retail businesses, offering comprehensive inventory management, customizable reports and seamless integration with Commerce platforms, thereby improving operational efficiency and driving growth.

### Restaurants

Retail can benefit restaurants by providing efficient inventory management solutions, enabling them to track stock levels, manage transfers between locations and generate customizable reports for informed decision-making.

### Personal services

Personal service providers, such as boutique shops or specialty stores, can leverage Retail to streamline inventory management across multiple locations, saving time and effort while ensuring accurate stock tracking and reporting.

# RetailCP Restaurant Orders Display

**Developer**  
RetailCP

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Web and 3rd Gen Devices

## Price and subscription information

Monthly: £9.70/month

Mobile-away: £14.95/month

## Description

RetailCP Restaurant Orders Display is designed for dine-in cafes and restaurants, providing a clear and organized view of orders. It separates items by drinks versus food categories, including appetisers, mains, desserts and salads. The app offers views for open and completed orders and allows users to mark items or orders as "In Progress", "Done", or "Delivered". It also displays order types such as dine-in, take-away and delivery. Additionally, the app features a "Waiter away" button to alert the kitchen to complete mains for specific tables.

The app utilizes Clover Inventory (Label IDs) for categorizing items, streamlining the order management process. While suitable for dine-in establishments, it may not be suitable for very fast-paced take-away coffee shops. For such environments, RetailCP offers alternative display apps.

## How the app can help different industries

### Retail

RetailCP Restaurant Orders Display assists retail businesses in the food industry by providing an organized view of orders, helping them streamline operations and improve efficiency in managing dine-in services.

### Restaurants

This app is specifically tailored for restaurants and cafes, offering clear order views and efficient management of orders, enhancing customer service and kitchen operations.

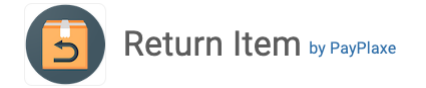

### Personal services

Personal service providers in the food industry, such as caterers or event venues, can benefit from RetailCP Restaurant Orders Display by efficiently managing orders and improving communication between front-of-house and kitchen staff.

# Return Item

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Register
- Table Service

### Devices/Platform

Station Duo 2 & 3rd Gen  
Devices

## Price and subscription information

License: £0.99/month

## Description

Return Item by PayPlaxe simplifies the process of returning items to your inventory. With this app, you can easily return all refunded items back to your stock without any additional setup. The app provides a user-friendly interface where you can select the items to return, making the process quick and efficient. Additionally, you can check the returns history on the Reports screen and export reports to an Excel file for further analysis.

## How the app can help different industries

### Retail

Retail businesses can benefit from Return Item by PayPlaxe by streamlining the process of returning items to stock, ensuring accurate inventory management and reducing errors.

### Restaurants

Restaurants can use this app to manage returns of unused or refunded items, maintaining inventory accuracy and optimizing stock levels.

### Personal services

Personal service providers, such as rental businesses or event organizers, can utilize Return Item by PayPlaxe to efficiently return items to inventory after use, ensuring smooth operations and inventory management.

# Returns

## Developer

Abreeze  
Technology

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Mobile, Station Duo 2 & 3rd  
Gen Devices

### Price and subscription information

All Access: £2.00/month

### Description

The Returns application by Abreeze Technology simplifies the process of returning items to inventory when processing a refund or exchange. It offers an intuitive interface where users can easily select which items to return, with pre-selection for items being refunded. Additionally, the app allows users to access previous refunds and process returns from them, providing a seamless and efficient workflow for inventory management.

## How the app can help different industries

### Retail

Retail businesses can use the Returns app to streamline the return process, ensuring that items are efficiently returned to inventory, maintaining accurate stock levels and improving operational efficiency.

### Restaurants

Restaurants can benefit from the Returns app by simplifying the return process for unused or refunded items, helping to maintain inventory accuracy and optimize stock management.

### Personal services

Personal service providers, such as rental businesses or event organizers, can utilize the Returns app to efficiently manage returns of items, ensuring smooth operations and accurate inventory management.

# Screen Capture

## Description

SeatOn Reservations is a restaurant arrival management system designed to efficiently manage tables. It offers various features such as online reservations from the website, IVR system, or manual creation, walk-in and waitlist management, customer data management and feedback capture. The app provides various reports including occupancy rate, employee performance, revenue trend and more to help businesses gain insights and increase profits. SeatOn enables restaurants to optimize table occupancy, minimize no-shows and enhance customer satisfaction.

## How the app can help different industries

### Retail

SeatOn Reservations can assist retail businesses with table management for events or gatherings, allowing them to efficiently allocate seating and manage.

### Restaurants

Restaurants can benefit from SeatOn Reservations by streamlining table management processes, reducing wait times and optimizing seating arrangements to enhance customer experience and increase revenue.

### Personal services

Personal service providers, such as event venues or catering businesses, can utilize SeatOn Reservations to manage bookings and optimize resource allocation, improving operational efficiency and customer satisfaction.

## Developer

LoyLap

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

3rd Gen Devices and Mobile

### Price and subscription information

Pro Plan: £40.00/month

### Description

Self Checkout by LoyLap transforms your existing Clover device into a standalone, unmanned self-ordering kiosk, simplifying the ordering process and increasing efficiency. With multiple UI modes such as Scan and Go, Product Selector and Donations, this app offers flexibility to cater to different customer preferences. It seamlessly integrates with LoyLap's Software Suite, including Gift Cards and Loyalty, enhancing customer engagement and retention. Self Checkout streamlines transactions, speeds up order processing and enables seamless payments, including credit card, debit card, or contactless methods. It also provides recommendations to customers, encouraging upselling and cross-selling opportunities. Additionally, the app offers customization options to align with your business's branding and unique requirements.

## How the app can help different industries

### Retail

Self Checkout is ideal for retail businesses looking to streamline the ordering process, increase transaction speeds and reduce operational costs by automating tasks.

### Restaurants

Restaurants can benefit from Self Checkout by offering customers a convenient and efficient self-ordering experience, increasing order throughput and improving customer satisfaction.

### Service Providers

Personal service providers, such as event venues or entertainment facilities, can utilize Self Checkout to offer self-service options to their customers, enhancing convenience and efficiency.

- Table Service

#### Devices/Platform

Station Duo 2, 3rd Gen Devices, Station Solo.

### Price and subscription information

Pro: £15.00/month

### Description

Smart Print enhances clover printing capabilities by allowing orders to be sent to different printers based on order type and device. It simplifies order fulfilment by sorting items and automatically printing orders from Clover.

## How the app can help different industries

### Restaurants and Bars

#### Automate Order Printing

Streamline the order-taking process by automatically printing orders at designated printers for eat-in, takeaway, or bar orders.

#### Improve Order Accuracy

Reduce errors by ensuring orders are printed at the correct location, whether it's the kitchen or the bar.

#### Enhance Customer Service

Speed up service delivery by having orders printed and ready for preparation as soon as they are placed.

### Retail Stores

#### Manage Multiple Departments

Direct printing to specific departments, like groceries or electronics, based on the type of item purchased.

#### Increase Efficiency

Save time by having receipts and order summaries printed automatically upon purchase.

#### Optimize Staff Workflow

Assign and print tasks for staff members based on department needs, improving overall store management.

### Event Catering services

#### Streamline Event Orders

Automatically print catering orders to the appropriate service area, whether it's for food, beverages, or special requests.

#### Coordinate Large Events

Manage complex orders by printing them according to event sections like VIP, general, or backstage.

#### Improve Turnaround Time

Ensure prompt service by having orders printed and distributed to the relevant preparation areas quickly.

# Stream

## Developer Stream

### Available on

#### SaaS Plans

- Register
- Table Service

#### Devices/Platform

Web

### Price and subscription information

First 30 days free

€25 per month thereafter

### Description

Think of Stream as Grand Central Station; all of your Third-party orders (Uber Eats, Deliveroo, JustEat, etc...) will go straight to your Clover POS and print a ticket for the kitchen. Direct Delivery Integration! No more need for tablets and manual order entry into the POS. Additionally, with Stream you can make changes to your Third-party menus that will not affect your in-store menu.

## Benefits

- Publish everything from price markups to availability changes to all your third-party channels
- Ditch the tablets and receive all delivery and online orders directly to your Clover POS
- Manage all your physical and virtual locations in one place, including menus, orders, customers and more
- SmartMenu Technology reads your POS menu and your third-party menus to automatically build a perfect menu for you in seconds
- Real-time order management solutions including order cancellation, direct communication with customers and order throttling
- Multi-Unit and Ghost Kitchen Management for streamlined order, menu and analytics management

## How the app can help different industries

### Retail

- Streamline inventory updates and price changes across various online channels
- Consolidate online and in-store order management to improve efficiency and reduce errors
- Enhance customer experience by ensuring consistency across all sales platforms

### Restaurants

- Integrate all third-party delivery services directly into the Clover POS for seamless order processing
- Customize and update third-party menus without affecting in-store menus
- Manage multiple locations, including ghost kitchens, from a single platform
- Improve kitchen efficiency with direct-to-kitchen order printing and real-time order management

### Amusement Parks

#### Token Management

Streamline the process of selling and printing tokens, reducing the need for cash handling<sup>1</sup>.

#### Efficiency

Increase operational efficiency by allowing ride operators to accept tokens instead of managing transactions.

#### Cost Reduction

Lower operating costs by reducing the need for multiple Clover devices across the park.

### Event Organizers

#### Ticketing

Simplify ticket sales for events by offering tokens as a form of currency for entry or purchases.

#### Custom Tokens

Create custom token templates for special events, enhancing branding and customer experience.

#### Reporting

Utilize Clover reporting features to track sales and popular items at events.

### Public Transportation

#### Flexible Ticketing

Offer tokens for services like cruises or buses without being tied to a specific date, adding convenience for customers<sup>2</sup>.

#### Scanning and Validation

Use Clover flex to scan tokens and prevent multiple uses, ensuring fare compliance<sup>3</sup>.

#### Inventory Management

Manage the inventory of tokens and adjust denominations based on demand and usage patterns.

# Top Up: Purchase Orders

Top Up: Purchase Orders

- Table Service

#### Devices/Platform

Web

### Price and subscription information

Mission Control User £4.99/month

### Description

The Automated Purchase Orders app helps manage stock simply and easily. It generates purchase orders when items are low and adds stock to inventory upon receiving.

## How the app can help different industries

### Retail Industry

#### Automated Reordering

Retailers can use the app to automate the reordering process, ensuring shelves are never empty.

#### Inventory Management

The app can help track sales trends and adjust stock levels accordingly.

#### Vendor Management

Retailers can streamline communication with vendors, making the ordering process more efficient.

### Hospitality Industry

#### Supply Restocking

Hotels and restaurants can use the app to maintain consistent supplies of consumables and perishables.

#### Cost Control

By managing inventory effectively, the app can help reduce waste and control costs.

#### Order Accuracy

The app ensures that orders are accurate, preventing overstocking or stockouts.

### Healthcare Industry

#### Medical Supplies Tracking

Hospitals can track critical medical supplies and automate orders before they run out.

#### Budget Management

The app can assist in budgeting by providing clear data on stock usage and needs.

#### Vendor Compliance

Healthcare facilities can ensure vendors meet compliance standards through the app's management features.

Unlimited loyalty plans

Unlimited customer sign-ups<sup>1</sup>

Powerful data-driven insights<sup>2</sup>

Your own digital shop front in the iOS or Android app<sup>3</sup>

30-day free trial

## Description

Trezoro Loyalty is a comprehensive customer loyalty program that includes Points, Punchcards, Birthday Rewards, Sign Up Rewards, VIP Tiers, Email and more. It offers seamless integration with Clover and is highly customizable to fit the branding of your business<sup>4</sup>.

## How the app can help different industries

### Retail Industry

#### Customer Retention

Use points and punchcards to encourage repeat purchases.

#### Targeted Promotions

Offer birthday and sign-up rewards to increase customer engagement.

#### Product Promotion

Utilize bonus points on specific items to clear inventory.

### Hospitality Industry

#### Enhanced Guest Experience

Provide VIP tiers for frequent guests to foster loyalty.

#### Special Occasion Marketing

Leverage birthday rewards to attract customers on special dates.

#### Dynamic Pricing

Use percentage discounts to manage demand during off-peak times.

### Service Industry

#### Client Loyalty

Implement stamp cards for service packages to encourage repeat visits.

#### Referral Incentives

Offer sign-up rewards to expand customer base through referrals.

#### Membership Benefits

Create club member rewards to provide exclusive benefits and services<sup>5</sup>.

# Variable Price Barcode Parser

Variable Price Barcode Parser  
by CSI Works

**Developer**  
CSI Works

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/Platform

Station Duo 2 & 3rd Gen  
Devices

## Price and subscription information

Unlimited Use £9.99/month

## Description

The app allows merchants to use label printing scales with Clover POS. It supports defining items in Clover inventory as variable price or per unit and setting up the same item in the scale. The scale prints a label with a barcode that contains the item number and price, which Clover POS can recognize and process.

## How the app can help different industries

### Retail Grocery Stores

- Automate price labelling for fresh produce
- Streamline checkout processes with accurate, pre-labelled items
- Enhance inventory management with precise tracking of sold items

### Specialty Food Shops

- Offer detailed product information through custom labels
- Implement dynamic pricing for specialty items
- Improve customer experience with quick and easy transactions

### Warehouse Clubs

- Facilitate bulk item sales with weight-based pricing
- Reduce manual input errors with barcode scanning
- Optimize member checkout flow with efficient item identification

# Voucher Connect

Voucher Connect by Voucher Connect

#### Devices/Platform

Station Duo 2 & 3rd Gen Devices

### Price and subscription information

- Starter Plan: €5.00/month
  - Sell Vouchers Online
  - Redeem and Top-up Gift Cards directly from your Clover Terminal

### Description

Voucher Connect helps businesses sell Gift Cards. Our Clover integration enables the use of these Gift Cards by scanning a unique QR code on the Gift Card using the camera, or manually typing in the unique gift card code. This facilitates seamless transactions and enhances customer satisfaction.

## Benefits

- **Check and Redeem Gift Cards**  
Redeem Voucher Connect gift cards directly from Clover.
- **Online Sales**  
Sell gift vouchers and more from your website in minutes.
- **Reduce Human Error**  
Optimize reporting and minimize mistakes with automated systems.
- **Promotions**  
Create discounts, special offers, bonus prizes, or sell tickets and start selling in no time.

## How the app can help different industries

### Retail

#### Gift Card Management

Streamline the sale and redemption of gift cards, enhancing customer loyalty and increasing sales.

#### Promotional Campaigns

Easily implement discounts and special offers to attract and retain customers.

#### Optimized Reporting

Improve inventory and sales reporting accuracy, reducing errors and saving time.

### Restaurants

#### Efficient Service

Quickly redeem gift cards at the point of sale, speeding up the checkout process and enhancing customer experience.

#### Special Offers

Implement promotional campaigns and discounts to drive foot traffic and increase revenue.

#### Accurate Accounting

Ensure accurate financial reporting by tracking gift card sales and redemptions seamlessly.

### Personal Services

#### Convenient Redemption

Allow customers to easily redeem gift cards for services, improving client satisfaction and loyalty.

#### Sell Online

Expand your business by selling vouchers and gift cards online, reaching a wider audience.

#### Service Promotions

Create and manage special offers and discounts to attract new clients and retain existing ones.

# Weight Embedded Barcode Parser

Weight Embedded Barcode Parser

**Developer**  
CSI Works

## Available on

### SaaS Plans

- Essentials
- Register
- Table Service

### Devices/Platform

Station Duo 2 & 3rd Gen  
Devices

## Price and subscription information

Unlimited Use £9.99/month

## Description

The app enables merchants to use Label Printing Scales with Clover Devices, allowing for proper inventory tracking of weighted items and speeding up the checkout process with weight embedded barcodes<sup>1</sup>.

## How the app can help different industries

### Grocery Stores

#### Streamline Checkout

Use the app to speed up the checkout process by scanning weight embedded barcodes, reducing customer wait times.

#### Inventory Management

Track inventory accurately for items sold by weight, ensuring stock levels are maintained efficiently.

#### Promotions and Discounts

Implement dynamic pricing strategies for perishable goods by adjusting prices based on weight and sell-by dates.

### Specialty Retailers (For example, Butchers, Bakeries):

#### Product Identification

Quickly identify products with unique barcodes, facilitating a smoother transaction process.

#### Custom Orders

Easily manage custom orders by printing specific weight-based labels, enhancing customer service.

#### Loss Prevention

Monitor inventory with precise weight measurements to prevent loss due to mislabelling or theft.

### Logistics and Shipping Companies

#### Weight Verification

Ensure accurate billing and inventory tracking by verifying package weights during processing.

#### Efficiency in Handling

Improve handling efficiency by using barcodes that contain both item numbers and weight information<sup>2</sup>.

#### Data Analytics

Utilize weight data collected from barcodes for analytics, optimizing shipping routes and load planning.

**Youtube:** [youtube.com/payplaxe](https://www.youtube.com/payplaxe)

## How the app can help different industries

### Hospitality Industry

For restaurants and hotels, the Widget Calculator can enhance the efficiency of billing and order management by allowing staff to quickly calculate totals, taxes and split bills right at the point of service.

### Retail Industry

Retail workers can use the Widget Calculator to swiftly handle transactions, apply discounts and manage cash flows, which is particularly useful during peak hours to maintain customer satisfaction.

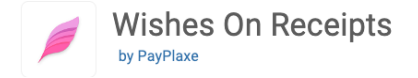

### Healthcare Sector

In pharmacies and clinics, staff can benefit from the app for calculating dosages, patient bills and insurance deductibles, ensuring accuracy in critical financial and health-related computations.

# Wishes On Receipts

**Developer**  
PayPlaxe

## Available on

### SaaS Plans

- Payments
- Essentials
- Register
- Table Service

### Devices/Platform

Station Duo 2 & 3rd Gen  
Devices

## Price and subscription information

License: £0.99/month

All features included, one subscription for the entire store.

## Description

The app allows sending random wishes to customers through order receipts. Users can create their own wishes or use more than 20 default wishes. There's also an option for a test print to see how the wish will look on real receipts.

## How the app can help different industries

### Retail Industry

#### Customer Engagement

Use the app to print personalized messages on receipts, enhancing customer experience and loyalty.

#### Promotions

Include special offers or discounts in the wishes to encourage repeat business.

#### Brand Awareness

Print fun facts or trivia related to the store's products to engage customers and promote the brand.

### Hospitality Industry

#### Personalized Service

Print wishes that reflect the occasion (For example, birthdays, anniversaries) to make guests feel special.

#### Feedback Collection

Use the receipt messages to invite customers to leave reviews or feedback online.

#### Event Promotion

Inform customers about upcoming events or specials at the hotel or restaurant.

### Delivery orders

#### Order Confirmation

Reinforce positive feelings by including a thank you message with each order.

#### Cross-Selling

Suggest related products or upcoming sales in the receipt messages.

#### Customer Retention

Offer a discount on the next purchase through a message on the receipt to encourage return visits.

# easyFood Manager

### Description

growyze is a stock control and accounting software designed for food and beverage businesses<sup>1</sup>. It features mobile barcode scanning, supplier management, invoice reconciliation, recipe management and automated reporting<sup>2</sup>.

## How the app can help different industries

### Food and Beverage Industry

#### Inventory Management

Use barcode scanning for efficient stocktakes and real-time data tracking.

#### Cost Control

Monitor supplier performance and track price changes to manage expenses.

#### Waste Reduction

Implement sustainable operations by identifying and reducing waste<sup>3</sup>.

### Hospitality Industry

#### Operational Efficiency

Streamline ordering and delivery processes with one-click supplier ordering.

#### Financial Accuracy

Validate invoices against deliveries automatically to ensure accurate billing.

#### Profitability Analysis

Control recipe profitability with the margin calculator to optimize menu pricing.

### Retail Grocery Stores

#### Stock Discrepancy Identification

Quickly identify discrepancies with ease, improving inventory accuracy.

#### Supplier Coordination

Manage multiple suppliers in one place for streamlined operations.

#### Data-Driven Decisions

Utilize automated reporting for informed decision-making regarding stock and pricing.
