

**YOU DO YOU,
WE DO THE REST. 🍀**

For cafés, restaurants and bars that have enough on their plate already

You know the feeling. The line is building. A table wants the bill. Someone needs to change a menu item. The card machine is doing its own thing. And somehow you're also meant to keep an eye on stock, staff and takings. That is exactly the kind of day Clover is built for.

Clover brings payments, POS and day-to-day business tools into one seamless setup, helping you get paid faster, keep everything in one place, and stay in control with clear insights and reporting. So service runs smoothly, admin takes less time, and your business keeps moving.

If your busiest hours feel like a mess, you're not the only one

If you run a café, you'll know the lunch rush feeling: queues building, orders stacking up, and every second at the till counting. In a full-service restaurant, it's more like controlled chaos, managing tables, kitchen orders and payments all at once.

For many venues, the issue isn't the team, it's the friction behind the scenes, from juggling multiple systems to time lost on manual admin.

Clover is designed to take that pressure off by making the basics easier, so your team can focus on service.

One setup that keeps up with service

With everything in one place, Clover brings together payments, POS and reporting, reducing workarounds and giving you a clearer view of your business.

For a café owner, that can mean faster checkout and fewer mistakes with modifiers. For a restaurant operator, it can mean smoother kitchen routing, easier table management, and less time spent sorting things after service.

The point is simple: when the setup works properly, the team can get on with the job.

Less running around. More serving

For restaurants, one of the biggest drains on time is the constant back and forth between tables and the till. Taking orders, running them through, and handling payments all adds up, especially when the room is full.

Clover helps reduce that pressure. Staff can take orders and payments where they are, send orders straight to the right prep point, and handle bills more easily, keeping service moving smoothly.

- **Shorter queues at peak time**
- **Fewer mistakes on complex orders**
- **Less pressure on staff during busy shifts**
- **A better guest experience without adding unnecessary complexity**

Faster service also means faster payments, helping keep cash flowing during your busiest moments.

A real example: Revo

Revo Kitchen & Terrace in Weston-super-Mare faced a common challenge: time lost to disconnected systems. Staff were moving between tables and the bar to complete payments, causing queues and slowing down simple updates.

With Clover, Revo moved to one connected setup using Clover Table Service Restaurant Plan, Clover Station Duo, Clover Mini and 11 Clover Flex devices. That meant the team could take orders and payments at the table, make changes in real time across devices and spend less time wrestling with multiple back-office tools. That is what 'less friction' looks like in real life.

The result:

30% Increase

in takings during the
busy April 2025 period

**2 Fewer
staff needed**

during peak season

10% Savings

on annual POS and
card terminal costs

*"With Clover's
end-to-end solutions
in place, my team can focus
on serving our customers."*

Hardware that fits the way you work

Not every venue needs the same setup. A compact café counter is different from a busy dining room. A mobile team on the floor works differently from a fixed till at the front.

That is why Clover hardware works as part of one connected system, bringing everything into one place, helping you get paid faster, and giving you more control with clear insights and reporting.

Clover Flex

A handheld POS for taking orders and payments on the move.

Clover Flex Pocket

A lighter, pocket-sized option for fast-moving environments.

Clover Mini

A compact countertop solution for smaller spaces.

Clover Station

A central hub for service, payments and daily operations.

Payments are only useful if they do not get in the way

Clover helps you get paid quickly and seamlessly, without slowing service or creating extra steps. Because payments sit inside the wider Clover setup, they work alongside the POS rather than off to the side.

In practice, this means a more consistent workflow with less duplication for your team.

A useful offer if you want to do more than just take payments

Some businesses just want to get started with payments. Others need more support with day-to-day tasks like inventory, reporting and promotions; that's where Clover Register Lite comes in.

Right now, you can get 90 days of Register Lite free, giving you access to more tools without long-term commitment.

Try more of Clover with a 90-day free upgrade to Register Lite, giving you more control, better insights and tools that help keep your business running smoothly.

£39.95 / month

Includes one device. Each additional device adds £6.99 to the plan.

Table Service

Tailored for restaurants and dining establishments, offering table management and order processing features to enhance customer service.

£59.95 / month

Includes one device. Each additional device adds £9.99 to the plan.

A funding option if you're ready to grow

If your venue is growing and you need extra breathing room to invest, eligible Clover customers can also apply for Business Capital. Provided by Liberis, it offers access to **funding from £1,000 to £500,000 with one fixed cost and no interest**. Repayments are taken automatically as an agreed percentage of card sales, so payments move with your business rather than landing as a fixed monthly bill. It could help with things like new equipment, refurbishment's, extra stock or simply giving cash flow more flexibility during busy periods.

Trusted by thousands of businesses already

★ Trustpilot

Clover UK holds a 4.6 “Excellent” Trustpilot rating from 2.6k+ reviews, putting it in the top tier of providers in the comparison and ahead of big names.

That gives you a solid proof point: Clover is one of the highest-rated POS providers in the market, and it is trusted by thousands of UK businesses already.

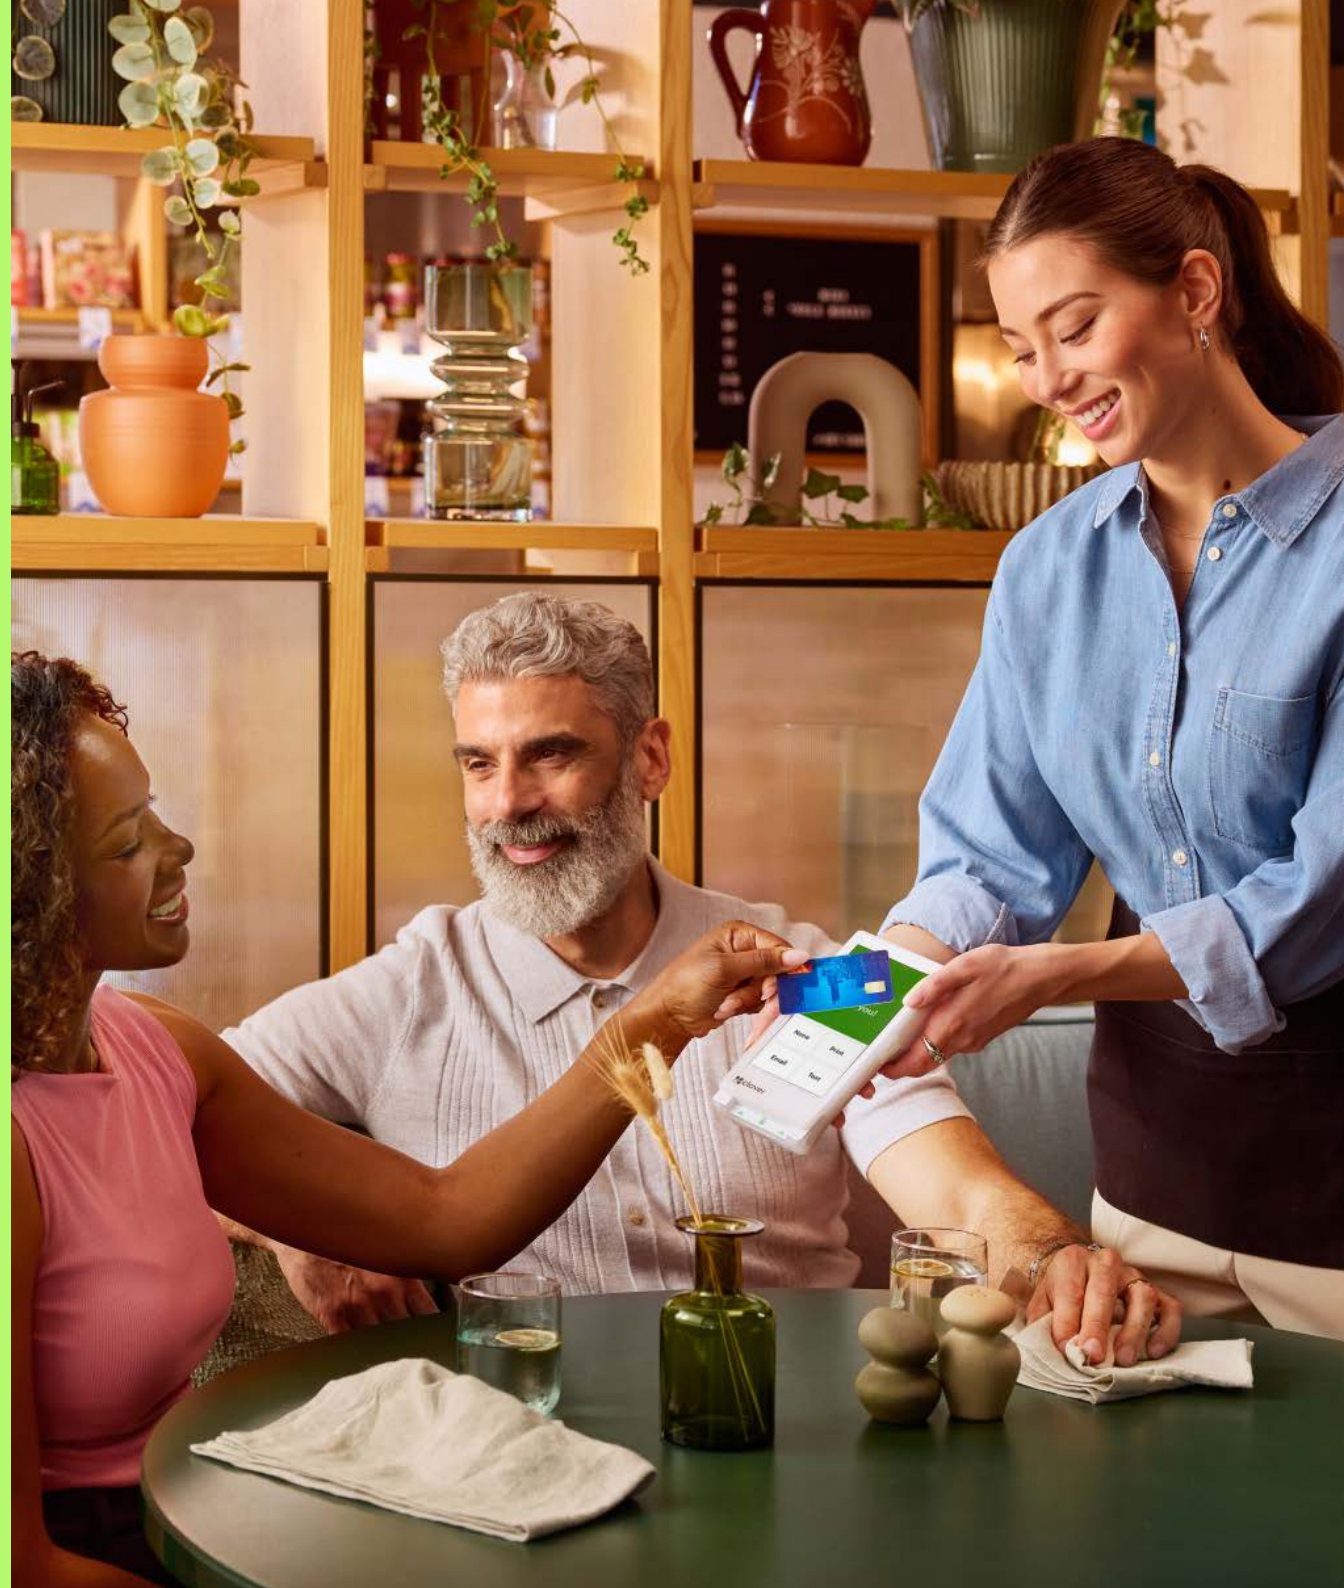

Highly rated on Trustpilot by thousands of UK businesses.

You handle the food, the drinks, the service and the atmosphere. We'll help with the rest.

If you're running a busy café or restaurant and juggling service with disconnected tools, Clover is built for that kind of day.

Whether you want to get paid faster, bring everything into one place, or stay in full control of your business, Clover is built to support the way you work.
