

# Exchange data the way you want

With API Integration, you're in control of taking payments from your customers.

Your customers will stay on your website to pay for what they want. And of course, they'll be able to pay with a range of cards. We don't tie your hands by limiting their choices.

## Manage data your way with us

### It's seamless and secure

Your customers' card details are captured directly on your website, and sent securely using an encrypted internet connection to your payment gateway for processing.

### Handles high volumes of transactions

API Integration is the preferred integration method for corporate businesses looking to process high volumes of transactions.

### Allows a comprehensive suite of payment types

Transactions are processed through XML – including sales, pre-authorisation, post-authorisation, return, credits, voids, 3D Secure, store cards, and recurring sales.

## The core details

### Fraud prevention add-ons

API Integration works with fraud prevention tools like 3D Secure, transaction blocking, and AVS/Security Code.

### 3D Secure and Amex Safekey

There's an extra layer of security for registered users with this payer authentication service.

### Faster payments with PayPal

Your customers can pay faster through PayPal.
